Share Class Inception: A, I - 8/30/06; F - 2/28/17. Share class performance prior to 10/24/16 reflects the performance of the predecessor fund. Performance shown prior to the inception of a class reflects performance and operating expenses of another class(es) (excluding sales charges, as applicable). Had fees and expenses of a class been reflected for the periods prior to the inception of that class, performance would be different. Since inception (SI) performance is from 8/30/06. Performance and expenses for other share classes will vary. Additional information is in the prospectus. Only Class A assesses a sales charge. Performance for periods of less than one year is not annualized.

Benchmark: MSCI ACWI ex USA Index is a broad-based, unmanaged, market capitalization weighted, total return index that measures the performance of both developed and emerging stock markets, excluding the US MSCI index performance is shown net of dividend withholding tax. Indices are unmanaged and not available for direct investment.

2016	8.80
2015	-4.82

Performance data quoted represents past performance and does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For more current performance information to the most recent month ended, please visit hartfordfunds.com.

Investors should carefully consider a fund's investment objectives, risks, charges and expenses. This and other important information is contained in a fund's full prospectus and summary prospectus, which can be obtained by visiting hartfordfunds.com. Please read it carefully before investing.

Mutual funds are distributed by Hartford Funds Distributors, LLC (HFD), Member FINRA. Advisory services are provided by Hartford Funds Management Company, LLC (HFMC). Certain funds are sub-advised by Schroder Investment Management North America Inc (SIMNA). Schroder Investment Management North America Ltd. (SIMNA Ltd) serves as a secondary sub-adviser to certain funds. HFMC, SIMNA, and SIMNA Ltd. are all SEC registered investment advisers. Hartford Funds refers to HFD and HFMC, which are not affiliated with any sub-adviser.

Holdings and characteristics are subject to change. Percentages may be rounded.

Important Risks: Investing involves risk, including the possible loss of principal. Security prices fluctuate in value depending on general market and economic conditions and the prospects of individual companies. • Foreign investments may be more volatile and less liquid than U.S. investments and are subject to the risk of currency fluctuations and adverse political, economic and regulatory developments. These risks may be greater, and include additional risks, for investments in emerging markets or if the Fund focuses in a particular geographic region or country. • Small- and mid-cap securities can have greater risks and volatility than large-cap securities. • The securities of large market capitalization companies may underperform other segments of the market. • Value investing style may go in and out of favor, which may cause the Fund to underperform other equity funds that use different investing styles. • The value of securities selected using quantitative analysis can perform differently from the market as a whole or from their expected performance. • Derivatives are generally more volatile and sensitive to changes in market or economic conditions than other securities; their risks include currency, leverage, liquidity, index, pricing, valuation, and counterparty risk. • The Fund may have high portfolio turnover, which could increase its transaction costs and an investor's tax liability. • Financially material environmental, social and/or governance (ESG) characteristics are one of several factors that may be considered. The Fund may perform differently from funds that do not integrate ESG into their analysis.

Beta measures the volatility of a portfolio relative to a benchmark. A beta of less than 1.00 indicates lower risk than the market; a beta of greater than 1.00 indicates higher risk than the market. **R Squared** represents the percentage of the portfolio's movement that can be explained by the market. **Standard Deviation** measures the portfolio's total-return volatility. A higher standard deviation indicates greater historical volatility. **Turnover** is a measure of the Fund's trading activity which represents the portion of the Fund's holdings that has changed over a twelve-month period through the Fund's fiscal year end. Turnover shown excludes To-Be-Announced roll transactions, if any. **Price/Earnings** is the ratio of a stock's price to its earnings per share. **Price/Book** is the ratio of a stock's price to its book value per share. **Return on Equity** is the average amount of net income returned as a percentage of shareholder's equity over the past five years. **Asset Weighted Market Cap** is the value of a corporation as determined by the number of outstanding shares of common stock multiplied by the price per share.
