Lipper Peer Group Global Multi-Cap Value

Market Overview

Global equities rose in the second quarter. The global landscape was marked by disparities in inflation and economic growth across countries, while robust earnings from a select group of mega-cap technology companies helped propel the MSCI ACWI Index to all-time highs. The European Central Bank began easing interest rates in June, while the US Federal Reserve (Fed) held its policy rate steady. Financial market expectations for the Fed to commence easing monetary policy were pushed into the second half of the year amid sticky inflation and moderating economic indicators. Global economic growth remained solid as the J.P. Morgan Global Composite Purchasing Managers' Index reached a 12-month high. US investment spending remained strong, bolstered by megaproject subsidies, while US consumer spending softened. Consumption growth remained healthy across the European Union supported by improving real wage growth.

Performance Summary

- Hartford Climate Opportunities Fund (I Share) underperformed the MSCI All-Country World Index.
- Benchmark-relative underperformance during the quarter was driven by weak security selection and allocation within information technology and industrials.
- From a region/country perspective, companies held within the US detracted from relative results.
- From a sector perspective, the structural underweight to information technology detracted the most. Overweight to industrials also detracted from performance.
- The top relative detractor for the quarter was NVIDIA Corporation while the top relative contributor was First Solar, Inc.

Positioning & Outlook

- At the overall Fund level, the largest climate theme allocation at the end of the quarter was in energy efficiency, with approximately 23% of the Fund's assets.
- Environmental resource management was the second-largest thematic allocation, with 19% of the Fund's assets.
- The rest of the Fund's assets were allocated to the following climate themes: clean energy (18%), lower carbon leaders (13%), sustainable transport (12%), and climate resilient infrastructure (11%).
- At the regional level, 66% of the Fund's assets were invested in US stocks, with 32% in non-US stocks and the remaining balance in cash.
- We believe current market uncertainty and volatility are creating attractive opportunities for companies that are uniquely positioned to benefit from the global challenges and opportunities related to climate change.

Performance data quoted represents past performance and does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For more current performance information to the most recent month ended, please visit hartfordfunds.com.

Share Class Inception: A, I, R3, R4, R5, R6, Y - 2/29/16; F - 2/28/17. Performance shown prior to the inception of a class reflects performance and operating expenses of another class(es) (excluding sales charges, if applicable). Had fees and expenses of a class been reflected for the periods prior to the inception of that class, performance would be different. Since inception (SI) performance is from 2/29/16. Performance and expenses for other share classes will vary. Additional information is in the prospectus. Only Class A assesses a sales charge.

MSCI ACWI Index is a free float-adjusted market capitalization index that measures equity market performance in the global developed and emerging markets, consisting of developed and emerging market country indices. MSCI index performance is shown net of dividend withholding tax. Indices are unmanaged and not available for direct investment.

Neither MSCI nor any other party involved in or related to compiling, computing or creating the MSCI data makes any express or implied warranties or representations with respect to such data (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such data. Without limiting any of the foregoing, in no event shall MSCI, any of its affiliates or any third party involved in or related to compiling, computing or creating the data have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages. No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

¹Expenses as shown in the Fund's most recent prospectus. Gross expenses do not reflect contractual expense reimbursement arrangements. Net expenses reflect such arrangements in instances when they reduce gross expenses. These arrangements remain in effect until 2/28/25 unless the Fund's Board of Directors approves an earlier termination. Without these arrangements, performance would have been lower.

Important Risks: Investing involves risk, including the possible loss of principal. Security prices fluctuate in value depending on general market and economic conditions and the prospects of individual companies. • The Fund's performance depends on the ability of the investment manager in selecting, overseeing, and allocating Fund assets to the sub-advisers. The sub-advisers' investment styles may not be complementary. • Small- and mid-cap securities can have greater risks and volatility than large-cap securities. • Foreign investments may be more volatile and less liquid than U.S. investments and are subject to the risk of currency fluctuations and adverse political, economic and regulatory developments. These risks may be greater, and include additional risks, for investments in emerging markets or if the Fund focuses in a particular geographic region or country. • The Fund's climate focus may result in foregoing certain investments and underperformance comparative to funds that do not have a similar focus. Certain climate-focused investments may be dependent on government policies and subsidies. • There are risks of focusing investments in securities of companies in the utilities and industrials sectors which may cause the Fund's performance to be sensitive to developments in those sectors.

Investors should carefully consider a fund's investment objectives, risks, charges and expenses. This and other important information is contained in a fund's full prospectus and summary prospectus, which can be obtained by visiting hartfordfunds.com. Please read it carefully before investing.

Mutual funds are distributed by Hartford Funds Distributors, LLC (HFD), Member FINRA. Advisory services are provided by Hartford Funds Management Company, LLC (HFMC). Certain funds are sub-advised by Wellington Management Company LLP, and/or Schroder Investment Management North America Inc (SIMNA). Schroder Investment Management North America Ltd. (SIMNA Ltd) serves as a secondary sub-adviser to certain funds. HFMC, Wellington Management, SIMNA, and SIMNA Ltd. are all SEC registered investment advisers. Hartford Funds refers to HFD and HFMC, which are not affiliated with any sub-adviser.
