

Exchange-traded funds (ETFs) designed by Hartford Funds—both strategic beta and actively managed—seek to provide investors with the tools to take greater control over the risks and opportunities in their portfolios.

Multifactor ETFs

With Hartford Funds Multifactor ETFs, we place risk and growth potential at the forefront of index design. Our goal: Take “better” risk¹ in pursuit of growth by allocating toward the risks we believe are more likely to generate returns.

		Expense Ratio ²	Portfolio Risk Parameters	Factors
ROUS	Hartford Multifactor US Equity ETF	0.19%	Seeks improved diversification across the large-cap universe	Value (50%), Momentum (30%), Quality (20%)
RODM	Hartford Multifactor Developed Markets (ex-US) ETF	0.29%	Seeks improved diversification beyond mega-cap multinationals; seeks up to 15% volatility reduction over a complete market cycle ³	Value (50%), Momentum (30%), Quality (20%)
ROGS	Hartford Multifactor Global Small Cap ETF	0.39%	Diversified exposure to small companies around the globe; seeks up to 15% volatility reduction over a complete market cycle ³	Value (50%), Momentum (30%), Quality (20%)

ROAM	Hartford Multifactor Emerging Markets ETF	0.49%	Seeks to balance risk across countries and seeks to improve exposure to emerging market economies beyond China, South Korea, and Taiwan	Value (50%), Momentum (30%), Quality (20%)

Multifactor Low Volatility ETFs

Seek the long-term performance potential of low volatility stocks while maintaining exposure to other potential return-enhancing factors.

		Expense Ratio ²	Portfolio Risk Parameters	Factors
LVUS	Hartford Multifactor Low Volatility US Equity ETF	0.21%	Seeks up to 25% volatility reduction over a complete market cycle; ³ seeks to maintain positive exposure to value, momentum, and quality factors; risk-balanced sector allocation	Low Volatility
LVIN	Hartford Multifactor Low Volatility International Equity ETF	0.29%	Seeks up to 25% volatility reduction over a complete market cycle; ³ seeks to maintain positive exposure to value, momentum, and quality factors; risk-balanced sector allocation	Low Volatility

Active Fixed-Income ETFs

Our active fixed-income ETFs seek to deliver the expertise of Wellington Management Company and Schroders in a cost- and potentially tax-efficient ETF structure.

		Expense Ratio ²	Investment Focus
HTRB	Hartford Total Return Bond ETF	0.30%	Diversified bond strategy that primarily invests in investment-grade bonds with flexibility to include high-yield and non-US dollar bonds
HMOP	Hartford Municipal Opportunities ETF	0.30%	A tax-advantaged income and total return strategy
HSRT	Hartford Short Duration ETF	0.32%	Seeks current income and long-term total returns by investing in fixed income securities
HTAB	Hartford Schroders Tax-Aware Bond ETF	0.39%	Seeks after-tax total return by focusing on investment-grade taxable and tax-exempt bonds

¹ The underlying indices of the Hartford Multifactor ETFs seek to improve risk and return potential relative to the capitalization-weighted benchmarks that are used by traditional capitalization weighted ETFs.

² Expenses are the total annual fund operating expenses as shown in the most recent prospectus.

³ Risk objectives are measured against the underlying index's eligible universe of securities, weighted by market capitalization.

HARTFORD FUNDS

Our benchmark is the investor.®

At Hartford Funds, your investment satisfaction is our measure of success. That's why we use an approach we call human-centric investing that considers not only how the economy and stock market impact your investments, but also how societal influences, generational differences, and your stage of life shape you as an investor.

Instead of cookie-cutter recommendations and generic goals, we think you deserve personalized advice from a financial advisor who understands your financial situation and can build a financial plan tailored to your needs.

Delivering strong performance is always our top priority. But the numbers on the page are only half the story. The true test is whether or not an investment is performing to your expectations.

For questions about trading Hartford Funds ETFs, please call our ETF Capital Markets team at 415-315-6600. For advisors seeking more information on Hartford Funds and our ETFs, please call our Sales Desk at 800-456-7526, and visit us at hartfordfunds.com.

Investors should carefully consider a fund's investment objectives, risks, charges and expenses. This and other important information is contained in the fund's prospectus and summary prospectus, which can be obtained by visiting hartfordfunds.com. Please read it carefully before investing.

Investing involves risk, including the possible loss of principal. • Foreign investments may be more volatile and less liquid than U.S. investments and are subject to the risk of currency fluctuations and adverse political and economic developments. These risks may be greater for investments in emerging markets. • Small cap securities can have greater risk and volatility than large-cap securities. • A concentration in real estate securities, such as REITs, may subject a fund to risks associated with the direct ownership of real estate as well as the risks related to the way real estate companies are organized and operated. Real estate is sensitive to changes in interest rates and general and local economic conditions and developments. • Diversification does not eliminate the risk of experiencing investment losses. • The Multifactor ETFs are not actively managed but rather attempt to track the performance of an index. The Multifactor ETF returns may diverge from that of the index.

• Fixed income security risks include credit, liquidity, call, duration, and interest-rate risk. As interest rates rise, bond prices generally fall. • Investments in high-yield ("junk") bonds involve greater risk of price volatility, illiquidity, and default than higher-rated debt securities. • Municipal securities may be adversely impacted by state/local, political, economic, or market conditions; these risks may be magnified if the fund focuses its assets in municipal securities of issuers in a few select states. Investors may be subject to the federal Alternative Minimum Tax as well as state and local income taxes. Capital gains, if any, are taxable. • Obligations of U.S. Government agencies are supported by varying degrees of credit but are generally not backed by the full faith and credit of the U.S. Government. • The risks associated with mortgage related- and asset-backed securities as well as collateralized loan obligations (CLOs) include credit, interest-rate, prepayment, liquidity, credit and extension risks. • Derivatives are generally more volatile and sensitive to changes in market or economic conditions than other securities; their risks include currency, leverage, liquidity, index, pricing, and counterparty risk. The net asset value (NAV) of the fixed income ETF funds' shares may fluctuate due to changes in the market value of the funds' holdings. The share price of the fixed income ETFs may fluctuate due to changes in the relative supply of and demand for the shares on an exchange. The fixed income ETFs are actively managed and do not seek to replicate the performance of a specified index.

Fund Objectives: **ROAM** seeks to provide investment results that, before fees and expenses, correspond to the total return performance of an index based upon the emerging markets of the world. **RODM** seeks to provide investment results that, before fees and expenses, correspond to the total return performance of an index that tracks the performance of companies located in major developed markets of Europe, Canada and the Pacific Region. **ROGS** seeks to provide investment results that, before fees and expenses, correspond to the total return performance of an index that tracks the performance of small cap companies in the US, developed and emerging markets. **RORE** seeks to provide investment results that, before fees and expenses, correspond to the total return performance of an index that tracks the performance of publicly traded real estate investment trusts. **ROUS** seeks to provide investment results that, before fees and expenses, correspond to the total return performance of an index that tracks the performance of publicly traded US equity securities. **LVIN** seeks to provide investment results that, before fees and expenses, correspond to the total return performance of an index that tracks companies located in both developed (excluding US) and emerging markets. **LVUS** seeks to provide investment results that, before fees and expenses, correspond to the total return performance of an index that tracks exchange traded US equity securities. **HSRT** seeks to provide current income and long-term total return. **HTAB** seeks total return on an after-tax basis. **HTRB** seeks a competitive total return, with income as a secondary objective. **HMOP** seeks to provide current income that is generally exempt from federal income taxes, and long-term total return.

Exchange-traded products are distributed by ALPS Distributors, Inc. (ALPS). Advisory services may be provided by Hartford Funds Management Company, LLC (HFMC) or its wholly owned subsidiary, Lattice Strategies, LLC (Lattice). Certain funds are sub-advised by Wellington Management Company LLP or Schroder Investment Management North America Inc. Schroder Investment Management North America Ltd. serves as a secondary sub-adviser to certain funds. Hartford Funds refers to Hartford Funds Distributors, LLC, Member FINRA, HFMC, and Lattice, which are not affiliated with ALPS or any sub-adviser.
