

Thanks to rate hikes, CDs and bonds have delivered attractive yields. But with the stage set for rate changes, there's a layer of uncertainty for income investors. The Hartford Balanced Income Fund can offer the opportunity to not only tailor an income stream to meet future needs, but also grow your investment—regardless of when, or how much, interest rates move.

Unpredictable Income

12-Month CD

CDs create income that fluctuates with interest rates. Rolling over a CD to the current rate leads to an unpredictable income stream that may not keep up with the higher cost of goods and services.

Initial Investment on 1/1/14:	\$100,000
Total Income Received:	\$10,840
Value of Investment on 3/31/24:	\$100,000

Flat Income, No Growth

10-Year US Treasury Bond

Treasury bonds provide a stable source of income over a fixed number of years. However, there's no guarantee that the same rate will be available when the bond matures and money needs to be reinvested.

Initial Investment on 1/1/14:	\$100,000
Total Income Received:	\$21,900
Value of Investment on 3/31/24:	\$100,000

Rising Income With Growth Potential

Hartford Balanced Income Fund I

By establishing a systematic withdrawal plan—taking \$4,000 and increasing by 5% annually to adjust for inflation—you would have received more total income and grown the overall value of your investment.

Initial Investment on 1/1/14:	\$100,000
Total Withdrawals Received:	\$50,312
Value of Investment on 3/31/24:	\$117,631

Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For more current performance information to the most recent month ended, please visit hartfordfunds.com.

Hypothetical investment examples and the results for other time periods could differ substantially from that shown above. CD rate is based on the average 12-month CD rate at 12/31/14 and each December 31 thereafter. Bonds are based on a 2.19% coupon rate of the 10-year Treasury Bond at 12/31/14 and assumes the bond is held until maturity. Hartford Balanced Income Fund assumes a systematic withdrawal plan. The increasing amounts withdrawn do not represent dividends or income, but rather the proceeds from Fund shares sold. The ending value of the Hartford Balanced Income Fund assumes the continued reinvestment of dividends and capital gains and is for illustrative purposes only. Negative fund performance could result in the loss of the initial investment. Source: Morningstar, Bloomberg, FactSet and Hartford Funds, 4/24.

Important Risks: Investing involves risk, including the possible loss of principal. Security prices fluctuate in value depending on general market and economic conditions and the prospects of individual companies. The Fund's strategy for allocating a portion of its assets to specialist portfolio managers, and among different asset classes, may not work as intended. • Fixed income security risks include credit, liquidity, call, duration, and interest-rate risk. As interest rates rise, bond prices generally fall. • For dividend-paying stocks, dividends are not guaranteed and may decrease without notice. • Different investment styles may go in and out of favor, which may cause the Fund to underperform the broader stock market. • Foreign investments may be more volatile and less liquid than U.S. investments and are subject to the risk of currency fluctuations and adverse political, economic and regulatory developments. • Restricted securities may be more difficult to sell and price than other securities. • Derivatives are generally more volatile and sensitive to changes in market or economic conditions than other securities; their risks include currency, leverage, liquidity, index, pricing, regulatory and counterparty risk.

Mutual Funds: Involves risk including the possible loss of principal; underlying security prices fluctuate in value depending on general market and economic conditions and the prospects of individual companies; investments in a mutual fund is subject to fund operating expenses which will lower fund performance; professionally managed and seeks to diversify risk; Shares may be redeemed at any time. **Bonds:** Investment risk is concentrated and non-diversified; redemption of investment prior to maturity date may result in profit or loss; investments subject to inflationary, credit and interest rate risk; bonds may be marked up or down upon purchase or sale; absent default, an investor's principal is returned upon bond's maturity; fixed amount of income stream offered at pre-set intervals. **CDS:** Deposits up to \$250,000 are insured by the FDIC; investments offer a fixed rate of interest based on agreed upon investment period; interest income is taxable annually; early withdrawals will typically result in penalty.
