

RODM

Designed to provide equity exposure to developed markets (ex-US) with up to 15% less volatility over a complete market cycle than traditional capitalization-weighted indices

Lower Valuations

Seeks to invest in companies with lower valuations compared to the MSCI World ex USA Index while also taking into account fundamentals

More Opportunities

An emphasis on quality mid-cap developed-market (ex-US) stocks that are underrepresented in the MSCI World ex USA Index

Rules-based Index Methodology

Systematically designed to address risks while seeking exposures to return-enhancing factors

Average Annual Total Returns (%)

	QTD	YTD	1 Year	3 Year	5 Year	10 Year	SI

SI = Since Inception. Performance for periods of less than one year is not annualized.

Performance data quoted represents past performance and does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For more current performance information to the most recent month ended, please visit hartfordfunds.com.

Investors should carefully consider a fund's investment objectives, risks, charges and expenses. This and other important information is contained in the fund's prospectus and summary prospectus, which can be obtained by visiting hartfordfunds.com. Please read it carefully before investing.

ETF shares are bought and sold at market price, not net asset value (NAV). Total returns are calculated using the daily 4:00 p.m. Eastern Time NAV. Market price returns reflect the midpoint of the bid/ask spread as of the close of trading on the exchange where Fund shares are listed. Market price returns do not represent the returns an investor would receive if they traded shares at other times. Brokerage commissions apply and will reduce returns.

Fund Objective: Seeks to provide investment results that, before fees and expenses, correspond to the total return performance of an index that tracks the performance of companies located in major developed markets of Europe, Canada and the Pacific Region.

The Hartford Risk-Optimized Multifactor Developed Markets (ex US) Index methodology assigns a combined factor score to each company within the eligible universe. Within the risk parameters of the strategy, the methodology selects those with the highest aggregate score. The Value factor is measured by earnings yield, earnings before interest, tax, depreciation and amortization (EBITDA)/enterprise value (EV), operating cash flow/EV, revenue/EV, dividend yield and book value (used only in financials and real estate as a replacement to EBITDA/EV). The Momentum factor is measured by the last 12-month price return minus the last 1-month price return and the last 6-month price return minus the last 1-month price return. The Quality factor is measured by gross profitability/total assets. Indices are unmanaged and not available for direct investment.

The MSCI World ex USA Index is a free float-adjusted market capitalization index that captures large and mid cap representation across developed markets countries-excluding the United States.

MSCI World ex USA Value Index is a free float-adjusted market capitalization index that captures large and mid-cap securities that exhibit overall value style characteristics across developed markets countries excluding the United States. MSCI performance is shown net of dividend withholding tax.

Important Risks: Investing involves risk, including the possible loss of principal. Security prices of the Fund's underlying holdings will fluctuate in value depending on general market and economic conditions and the prospects of individual companies. The market price of the Fund's shares will fluctuate in response to changes in the Fund's net asset value, intraday value of the Fund's holdings, and the supply and demand for shares on the exchange. • The Fund is not actively managed but rather attempts to track the performance of an index. The Fund's returns may diverge from that of the index. • Foreign investments may be more volatile and less liquid than U.S. investments and are subject to the risk of currency fluctuations and adverse political, economic and regulatory developments. • Investments focused in a country, region, industry or group of industries may increase volatility and risk. • Mid-cap securities can have greater risks and volatility than large-cap securities.

MSCI performance is shown net of dividend withholding tax. IOPV, or Indicative Optimized Portfolio Value, is a calculation disseminated by the stock exchange that approximates the Fund's NAV every fifteen seconds throughout the trading day.

Price/Earnings is the ratio of a stock's current price divided by the trailing earnings per share for the past 12 months. **Price/Book** is the ratio of a stock's price to its book value per share.

Return on Equity is the average amount of net income after taxes that a firm is able to earn as a percent of stockholders equity. **Debt-to-equity ratio** measures a company's financial leverage calculated by dividing its total liabilities by stockholders' equity. **Nominal Countries/Companies** represents the total number of countries/companies included in the portfolio, regardless of allocation. **Effective Countries/Companies** measures portfolio concentration, in which a higher number would indicate a more diversified portfolio. **Index Dividend Yield** is the weighted average dividend yield of the securities in the underlying portfolio index (including cash). The number is not intended to demonstrate income earned or distributions made by the Fund and is not necessarily indicative of the dividend yield of the Fund. Fundamental characteristics are based on industry-standard calculation methodologies and determined by Hartford Funds. Holdings may not sum to 100% due to cash allocations. Sources for all data: Bloomberg, MSCI, and Hartford Funds.

ETFs are distributed by ALPS Distributors, Inc. (ALPS). Advisory services may be provided by Hartford Funds Management Company, LLC (HFMC), or its wholly owned subsidiary, Lattice Strategies LLC (Lattice). HFMC and Lattice are SEC registered investment advisers. Hartford Funds refers to Hartford Funds Distributors, LLC, Member FINRA, HFMC, and Lattice, which are not affiliated with ALPS.

The indices, which our multifactor ETFs seek to track, are calculated and distributed by Solactive AG, a firm retained and paid by the Indices' Provider (Lattice Strategies). Lattice Strategies is responsible for the methodology and selection of each index component.
