

ROAM

Designed to provide equity exposure to emerging markets with up to 15% less volatility over a complete market cycle than traditional capitalization-weighted indices

Our systematic, rules-based index methodology is designed to simultaneously address risks while seeking exposures to return-enhancing factors:

Set Risk Parameters

Seek to improve diversification versus a cap-weighted benchmark by reducing concentration at the country, sector, and individual company levels

Select Securities

Seek companies with a favorable combination of low valuation (50%), high momentum (30%), and high quality (20%) investment factors

Reconstitute and Rebalance

Reapply the investment process twice a year in March and September to ensure the portfolio stays true to the rules-based index methodology

¹Expenses are the total annual fund operating expenses as shown in the most recent prospectus.

Performance data quoted represents past performance and does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For more current performance information to the most recent month ended, please visit hartfordfunds.com.

Investors should carefully consider a fund's investment objectives, risks, charges and expenses. This and other important information is contained in the fund's prospectus and summary prospectus, which can be obtained by visiting hartfordfunds.com. Please read it carefully before investing.

The Hartford Multifactor Emerging Markets Equity Spliced Index reflects the performance of the Emerging Markets Index through 9/10/19 and the performance of the Emerging Markets Equity Index thereafter. The Fund's performance and historical returns shown for the periods prior to 9/11/19 are not necessarily indicative of the performance that the Fund would have generated based on its current custom underlying index.

ETF Shares are bought and sold at market price, not net asset value (NAV), and are not individually redeemed from the Fund. Total returns are calculated using the daily 4:00 p.m. Eastern Time NAV. Market price returns reflect the midpoint of the bid/ask spread as of the close of trading on the exchange where Fund shares are listed. Market price returns do not represent the returns an investor would receive if they traded shares at other times. Brokerage commissions apply and will reduce returns.

Fund Objective: Seeks to provide investment results that, before fees and expenses, correspond to the total return performance of an index based upon the emerging markets of the world.

Hartford Multifactor Emerging Markets ETF

Sector Allocation (%)

Broad sector exposures reflect emerging economic opportunities across countries.

	ROAM	MSCI Emerging Markets Index	Underweight/Overweight
Financials	19	17	2

Important Risks: Investing involves risk, including the possible loss of principal. Security prices fluctuate in value depending on general market and economic conditions and the prospects of individual companies. • Foreign investments may be more volatile and less liquid than U.S. investments and are subject to the risk of currency fluctuations and adverse political and economic developments. These risks may be greater for investments in emerging markets. • Investments focused in a sector, industry or group of industries may increase volatility and risk. • The Fund is not actively managed but rather attempts to track the performance of an index. The Fund's returns may diverge from that of the index.

The MSCI Emerging Markets Index is a free float-adjusted market capitalization index that is designed to measure emerging markets equity performance. MSCI performance is shown net of dividend withholding tax. The MSCI information may only be used for your internal use, may not be reproduced or disseminated in any form and may not be used as a basis for or a component of any financial instruments or products or indices. None of the MSCI information is intended to constitute investment advice or a recommendation to make (or refrain from making) any kind of investment decision and may not be relied on as such. Historical data and analysis should not be taken as an indication or guarantee of any future performance analysis, forecast or prediction. The MSCI information is provided on an "as is" basis and the user of this information assumes the entire risk of any use made of this information. MSCI, each of its affiliates and each other person involved in or related to compiling, computing or creating any MSCI information (collectively, the "MSCI Parties") expressly disclaims all warranties (including, without limitation, any warranties or originality, accuracy, completeness, timeliness, non-infringement, merchantability and fitness for a particular purpose) with respect to this information. IOPV, or Indicative Optimized Portfolio Value, is a calculation disseminated by the stock exchange that approximates the Fund's NAV every fifteen seconds throughout the trading day. **Price/Earnings** is the ratio of a stock's current price divided by the trailing earnings per share for the past 12 months. **Price/Book** is the ratio of a stock's price to its book value per share. **Nominal Countries/Companies** represents the total number of countries/companies included in the portfolio, regardless of allocation. **Effective Countries/Companies** measures portfolio concentration, in which a higher number would indicate a more diversified portfolio. **Debt-to-equity ratio** measures a company's financial leverage calculated by dividing its total liabilities by stockholders' equity. **Return on Equity** is the average amount of net income after taxes that a firm is able to earn as a percent of stockholders equity. **Index Dividend Yield** is the weighted average dividend yield of the securities in the underlying portfolio index (including cash). The number is not intended to demonstrate income earned or distributions made by the Fund and is not necessarily indicative of the dividend yield of the Fund. Fundamental characteristics are based on industry-standard calculation methodologies and determined by Hartford Funds. Holdings may not sum to 100% due to cash allocations. Sources for all data: Bloomberg, MSCI, and Hartford Funds.

Exchange-traded products are distributed by ALPS Distributors, Inc. (ALPS). Advisory services may be provided by Hartford Funds Management Company, LLC (HFMC) or its wholly owned subsidiary, Lattice Strategies LLC (Lattice). Hartford Funds refers to Hartford Funds Distributors, LLC, Member FINRA, HFMC, and Lattice, which are not affiliated with ALPS.

The indices, which our multifactor ETFs seek to track, are calculated and distributed by Solactive AG, a firm retained and paid by the Indices' Provider (Lattice Strategies). Lattice Strategies is responsible for the methodology and selection of each index component.
