Performance data quoted represents past performance and does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For more current performance information to the most recent month ended, please visit hartfordfunds.com.

Investors should carefully consider a fund's investment objectives, risks, charges and expenses. This and other important information is contained in a fund's full prospectus and summary prospectus, which can be obtained by visiting hartfordfunds.com. Please read it carefully before investing.

ETF shares are bought and sold at market price, not net asset value (NAV). Total returns are calculated using the daily 4:00 p.m. Eastern Time NAV. Market price returns reflect the midpoint of the bid/ask spread as of the close of trading on the exchange where Fund shares are listed. Market price returns do not represent the returns an investor would receive if they traded shares at other times. Brokerage commissions apply and will reduce returns.

Bloomberg U.S. Aggregate Bond Index is composed of securities from the Bloomberg Government/Credit Bond Index, Mortgage-Backed Securities Index, Asset-Backed Securities Index, and Commercial Mortgage-Backed Securities Index. Indices are unmanaged and not available for direct investment.

[†]Credit exposure is the credit ratings for the underlying securities of the Fund as provided by Standard and Poor's (S&P), Moody's Investors Service, or Fitch and typically range from AAA/Aaa (highest) to C/D (lowest). If S&P, Moody's, and Fitch assign different ratings, the median rating is used. If only two agencies assign ratings, the lower rating is used. Securities that are not rated by any of the three agencies are listed as "Not Rated." Ratings do not apply to the Fund itself or to Fund shares. Ratings may change.

Holdings and characteristics are subject to change. Percentages may be rounded.

Important Risks: The Fund is new and has a limited operating history. Investing involves risk, including the possible loss of principal. Security prices fluctuate in value depending on general market and economic conditions and the prospects of individual companies. The net asset value (NAV) of the Fund's shares may fluctuate due to changes in the market value of the Fund's holdings. The Fund's share price may fluctuate due to changes in the relative supply of and demand for the shares on an exchange. The Fund is actively managed and does not seek to replicate the performance of a specified index. • Fixed income security risks include credit, liquidity, call, duration, and interest-rate risk. As interest rates rise, bond prices generally fall. • Investments in high-yield ("junk") bonds involve greater risk of price volatility, illiquidity, and default than higher-rated debt securities. • Foreign investments may be more volatile and less liquid than U.S. investments and are subject to the risk of currency fluctuations and adverse political, economic and regulatory developments. These risks may be greater, and include additional risks, for investments in emerging markets. • Derivatives are generally more volatile and sensitive to changes in market or economic conditions than other securities; their risks include currency, leverage, liquidity, index, pricing, regulatory and counterparty risk. • The risks associated with mortgage-related and asset-backed securities include credit, interest-rate, prepayment, liquidity, default and extension risk. • The purchase of securities in the To-Be-Announced (TBA) market can result in higher portfolio turnover and related expenses as well as price and counterparty risk. • Restricted securities may be more difficult to sell and price than other securities. • Loans can be difficult to value and less liquid than other types of debt instruments; they are also subject to nonpayment, collateral, bankruptcy, default, extension, prepayment and insolvency risks. • Obligations of U.S. Government agencies are supported by varying degrees of credit but are generally not backed by the full faith and credit of the U.S. Government. • Applying sustainability criteria to the investment process may result in foregoing certain investments and underperformance comparative to funds that do not have a similar focus. There is a risk that the securities identified by the sub-adviser as meeting its sustainable investing criteria do not operate as anticipated. • The Fund may have high portfolio turnover, which could increase its transaction costs and an investor's tax liability. • In certain instances, unlike other ETFs, the Fund may effect creations and redemptions partly or wholly for cash, rather than in-kind, which may make the Fund less tax-efficient and incur more fees than an ETF that primarily or wholly effects creations and redemptions in-kind.

Effective Duration measures the sensitivity of an investment's price to nominal interest rate movement. **IOPV, or Indicative Optimized Portfolio Value**, is a calculation disseminated by the stock exchange that approximates the Fund's NAV every fifteen seconds throughout the trading day.

Exchange-traded products are distributed by ALPS Distributors, Inc. (ALPS). Advisory services are provided by Hartford Funds Management Company, LLC (HFMC). Certain funds are sub-advised by Wellington Management Company LLP. Hartford Funds refers to Hartford Funds Distributors, LLC, Member FINRA, and HFMC, which are not affiliated with ALPS or any sub-adviser.
