ETF shares are bought and sold at market price, not net asset value (NAV). Total returns are calculated using the daily 4:00 p.m. Eastern Time NAV. Market price returns reflect the midpoint of the bid/ask spread as of the close of trading on the exchange where Fund shares are listed. Market price returns do not represent the returns an investor would receive if they traded shares at other times. Brokerage commissions apply and will reduce returns.

Benchmark: Russell 1000 Growth Index is an unmanaged index which measures the performance of those Russell 1000 Index companies with higher price-to-book ratios and higher forecasted growth values. Indices are unmanaged and not available for direct investment.

Important Risks: Investing involves risk, including the possible loss of principal. Security prices of the Fund's underlying holdings will fluctuate in value depending on general market and economic conditions and the prospects of individual companies. The market price of the Fund's shares will fluctuate in response to changes in the Fund's net asset value, intraday value of the Fund's holdings, and the supply and demand for shares. • The Fund is actively managed and does not seek to replicate the performance of a specified index. • The securities of large market capitalization companies may underperform other segments of the market. • Different investment styles may go in and out of favor, which may cause the Fund to underperform the broader stock market. • To the extent the Fund focuses on one or more sectors, the Fund may be subject to increased volatility and risk of loss if adverse developments occur. • Because the Fund is non-diversified, it may invest in a smaller number of issuers, and may be more exposed to risks and volatility than a more broadly diversified fund.

IOPV, or Indicative Optimized Portfolio Value, is a calculation disseminated by the stock exchange that approximates the Fund's NAV every fifteen seconds throughout the trading day. **Price/Earnings** is the ratio of a stock's price to its earnings per share. **Price/Book** is the ratio of a stock's price to its book value per share. **EPS Growth Rate** is the projected growth rate in earnings per share for the next five years. **Return on Equity** is the average amount of net income after taxes that a firm is able to earn as a percent of stockholders equity. **Asset Weighted Market Cap** is the value of a corporation as determined by the number of outstanding shares of common stock multiplied by the price per share.

ETFs are distributed by ALPS Distributors, Inc. (ALPS). Advisory services are provided by Hartford Funds Management Company, LLC (HFMC).
