

HDUS

Designed to provide core US large-cap equity exposure by seeking balance and consistent exposure across multiple risk factors for return enhancement potential, while controlling for active risk compared to a similar broad market capitalization-weighted index.

Our systematic, rules-based index methodology is designed to simultaneously address risks while seeking exposures to return-enhancing factors:

Set Risk Parameters

Seeks to provide relative diversification to the index's starting universe over absolute diversification, with lower uncompensated active risk relative to the starting universe.

Select Securities

Seek companies with a favorable combination of low valuation, high momentum, high quality and dividend yield investment factors.

Reconstitute and Rebalance

Reapply the investment process twice a year in March and September to ensure the portfolio stays true to the rules-based index methodology.

¹Expenses are the total annual fund operating expenses as shown in the most recent prospectus.

Performance data quoted represents past performance and does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For more current performance information to the most recent month ended, please visit hartfordfunds.com.

Investors should carefully consider a fund's investment objectives, risks, charges and expenses. This and other important information is contained in a fund's full prospectus and summary prospectus, which can be obtained by visiting hartfordfunds.com. Please read it carefully before investing.

ETF shares are bought and sold at market price, not net asset value (NAV). Total returns are calculated using the daily 4:00 p.m. Eastern Time NAV. Market price returns reflect the midpoint of the bid/ask spread as of the close of trading on the exchange where Fund shares are listed. Market price returns do not represent the returns an investor would receive if they traded shares at other times. Brokerage commissions apply and will reduce returns.

Fund Objective: Seeks to provide investment results that, before fees and expenses, correspond to the total return performance of an index that tracks the performance of exchange traded U.S. large-cap equity securities.

Hartford Disciplined US Equity ETF

Sector Allocation (%)

HDUS diversifies exposure across sectors and explicitly avoids unintended sector concentrations.

	HDUS	Russell 1000 Index	Underweight/Overweight
Consumer Staples	8	6	2
Information Technology	28	27	1
Communication Services	9	8	1
Real Estate	4	3	1
Utilities	3	2	1
Energy	4	4	0

Russell 1000 Index	28.74

All holdings and allocations are subject to change.

Important Risks: The Fund is new and has a limited operating history. Investing involves risk, including the possible loss of principal. Security prices fluctuate in value depending on general market and economic conditions and the prospects of individual companies. • The Fund is not actively managed but rather attempts to track the performance of an index. The Fund's returns may diverge from that of the index. • Investments focused in a sector, industry or group of industries may increase volatility and risk.

Russell 1000 Index measures the performance of the large-cap segment of the U.S. equity universe. It is a subset of the Russell 3000® Index and includes approximately 1000 of the largest securities based on a combination of their market cap and current index membership. Indices are unmanaged and not available for direct investment.

IOPV, or Indicative Optimized Portfolio Value, is a calculation disseminated by the stock exchange that approximates the Fund's NAV every fifteen seconds throughout the trading day. **Price/Earnings** is the ratio of a stock's current price divided by the trailing earnings per share for the past 12 months. **Price/Book** is the ratio of a stock's price to its book value per share. **Nominal Companies** represents the total number of companies included in the portfolio, regardless of allocation. **Effective Companies** measures portfolio concentration, in which a higher number would indicate a more diversified portfolio. **Debt-to-equity ratio** measures a company's financial leverage calculated by dividing its total liabilities by stockholders' equity. **Return on Equity** is the average amount of net income after taxes that a firm is able to earn as a percent of stockholders equity. **Index Dividend Yield** is the weighted average dividend yield of the securities in the underlying portfolio index (including cash). The number is not intended to demonstrate income earned or distributions made by the Fund and is not necessarily indicative of the dividend yield of the Fund. Fundamental characteristics are based on industry-standard calculation methodologies and determined by Hartford Funds. Holdings may not sum to 100% due to cash allocations.

ETFs are distributed by ALPS Distributors, Inc. (ALPS). Advisory services may be provided by Hartford Funds Management Company, LLC (HFMC), or its wholly owned subsidiary, Lattice Strategies LLC (Lattice). HFMC and Lattice are SEC registered investment advisers. Hartford Funds refers to Hartford Funds Distributors, LLC, Member FINRA, HFMC, and Lattice, which are not affiliated with ALPS.

The indices, which our multifactor ETFs seek to track, are calculated and distributed by Solactive AG, a firm retained and paid by the Indices' Provider (Lattice Strategies). Lattice Strategies is responsible for the methodology and selection of each index component.
