Important Risks: Investing involves risk, including the possible loss of principal. Security prices fluctuate in value depending on general market and economic conditions and the prospects of individual companies. • The Fund's performance depends on the ability of the Investment Manager in selecting, overseeing, and allocating Fund assets to the sub-advisers. The sub-advisers' investment styles may not be complementary. • Small- and mid-cap securities can have greater risks and volatility than large-cap securities. • Foreign investments may be more volatile and less liquid than U.S. investments and are subject to the risk of currency fluctuations and adverse political, economic and regulatory developments. These risks may be greater, and include additional risks, for investments in emerging markets or if the Fund focuses in a particular geographic region or country. • Focusing on investments that involve climate change opportunities or sustainable and environmental initiatives may result in foregoing certain investments and underperformance comparative to funds that do not have a similar focus. • The exclusion of certain issuers for reasons other than performance may negatively impact the Fund's performance. • There are risks of focusing investments in securities of companies in the utilities and industrials sectors which may cause the Fund's performance to be sensitive to developments in those sectors.
