Share Class Inception: R3, R4, R5 - 12/22/06; R6 - 11/7/14; Y - 7/22/96. Performance shown prior to the inception of a class reflects performance and operating expenses of another class(es). Had fees and expenses of a class been reflected for the periods prior to the inception of that class, performance would be different. Since inception (SI) performance is from 7/22/96. Performance and expenses for other share classes will vary. Additional information is in the prospectus.

MSCI ACWI ex USA Index is a broad-based, unmanaged, market capitalization weighted, total return index that measures the performance of both developed and emerging stock markets, excluding the U.S. MSCI index performance is shown net of dividend withholding tax. Indices are unmanaged and not available for direct investment.

Calendar Year Returns (%) Y Shares

2020	2019	2018	2017	2016	2015	2014	2013	2012	2011
20.62	26.17	-18.69	24.71	1.15	1.56	-4.10	20.96	19.58	-13.36

Performance data quoted represents past performance and does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For more current performance information to the most recent month ended, please visit hartfordfunds.com.

Investors should carefully consider a fund's investment objectives, risks, charges and expenses. This and other important information is contained in a fund's full prospectus and summary prospectus, which can be obtained by visiting hartfordfunds.com. Please read it carefully before investing.

Benchmark MSCI ACWI ex USA Index

Holdings and characteristics are subject to change. Percentages may be rounded.

Important Risks: Investing involves risk, including the possible loss of principal. Security prices fluctuate in value depending on general market and economic conditions and the prospects of individual companies. • Foreign investments may be more volatile and less liquid than U.S. investments and are subject to the risk of currency fluctuations and adverse political, economic and regulatory developments. These risks may be greater, and include additional risks, for investments in emerging markets. • Mid-cap securities can have greater risks and volatility than large-cap securities. • To the extent the Fund focuses on one or more sectors, geographic regions or countries, the Fund may be subject to increased volatility and risk of loss if adverse developments occur. • Integration of environmental, social, and/or governance (ESG) factors into the investment process may not work as intended. • The Fund may have high portfolio turnover, which could increase its transaction costs and an investor's tax liability.

Asset Weighted Market Cap is the value of a corporation as determined by the number of outstanding shares of common stock multiplied by the price per share. **Beta** measures the volatility of a portfolio relative to a benchmark. A beta of less than 1.00 indicates lower risk than the market; a beta of greater than 1.00 indicates higher risk than the market. **EPS Growth Rate** is the projected growth rate in earnings per share for the next five years. **Price/Book** is the ratio of a stock's price to its book value per share. **Price/Earnings** is the ratio of a stock's price to its earnings per share. **Return on Equity** is the average amount of net income returned as a percentage of shareholder's equity over the past five years. **R Squared** represents the percentage of the portfolio's movement that can be explained by the market. **Turnover** is a percentage of a portfolio's assets that have changed over the course of a year. It is calculated by dividing the average assets during the period by the lesser of the value of purchases or the value of sales during the same period.
