Share Class Inception: R3, R4, R5, Y - 5/28/10; R6 - 2/28/19.

Performance shown prior to the inception of a class reflects performance and operating expenses of another class(es) (excluding sales charges, if applicable). Had fees and expenses of a class been reflected for the periods prior to the inception of that class, performance would be different. Since inception (SI) performance is from 5/28/10. Performance and expenses for other share classes will vary. Additional information is in the prospectus.

**MSCI EAFE Value Index** is a free-float weighted index. The Index represents the securities classified as "value" securities by MSCI that are members of the MSCI EAFE Index. The MSCI EAFE region covers developed-market countries in Europe, Australasia, and the Far East. MSCI index performance is shown net of dividend withholding tax. Indices are unmanaged and not available for direct investment.

### Calendar Year Returns (%) Y Shares

### Expenses (%)<sup>1</sup>

	R3	R4	R5	R6	Y
Gross	1.58	1.28	0.95	0.86	0.93
Net	1.58	1.28	0.95	0.86	0.92

<sup>1</sup> Expenses as shown in the Fund's most recent prospectus. Gross expenses do not reflect contractual fee waivers or expense reimbursement arrangements. Net expenses reflect such arrangements only with respect to Class Y. These arrangements remain in effect until 2/28/22 unless the Fund's Board of Directors approves an earlier termination.

Benchmark MSCI EAFE Value Index

Holdings and characteristics are subject to change. Percentages may be rounded.

**Important Risks:** Investing involves risk, including the possible loss of principal. Security prices fluctuate in value depending on general market and economic conditions and the prospects of individual companies. • Foreign investments may be more volatile and less liquid than U.S. investments and are subject to the risk of currency fluctuations and adverse political, economic and regulatory developments. These risks may be greater, and include additional risks, for investments in emerging markets. These risks may also be greater, and there may be additional risks, if the Fund focuses in a particular geographic region or country, such as Japan. • Different investment styles may go in and out of favor, which may cause the Fund to underperform the broader stock market. • Small- and mid-cap securities can have greater risks and volatility than large-cap securities. • To the extent the Fund focuses on one or more sectors, the Fund may be subject to increased volatility and risk of loss if adverse developments occur.

**Asset Weighted Market Cap** is the value of a corporation as determined by the number of outstanding shares of common stock multiplied by the price per share. **Beta** measures the volatility of a portfolio relative to a benchmark. A beta of less than 1.00 indicates lower risk than the market; a beta of greater than 1.00 indicates higher risk than the market. **EPS Growth Rate** is the projected growth rate in earnings per share for the next five years. **Price/Book** is the ratio of a stock's price to its book value per share. **Price/Earnings** is the ratio of a stock's price to its earnings per share. **Return on Equity** is the average amount of net income returned as a percentage of shareholder's equity over the past five years. **R Squared** represents the percentage of the portfolio's movement that can be explained by the market. **Turnover** is a percentage of a portfolio's assets that have changed over the course of a year. It is calculated by dividing the average assets during the period by the lesser of the value of purchases or the value of sales during the same period.
