Share Class Inception: R3, R4, R5 - 11/12/21; Y - 6/29/20; SDR - 1/31/18. Share class performance prior to 11/15/21 reflects the performance, fees and expenses of the predecessor fund Schroder Core Bond Fund. Performance shown prior to the inception of a class reflects performance and operating expenses of another class(es). Had fees and expenses of a class been reflected for the periods prior to the inception of that class, performance would be different. Since inception (SI) performance is from 1/31/18. Performance and expenses for other share classes will vary. Additional information is in the prospectus. Performance for periods of less than one year is not annualized.

Benchmark: Bloomberg US Aggregate Bond Index is composed of securities that cover the US investment grade fixed rate bond market, with index components for government and corporate securities, mortgage pass-through securities, and asset-backed securities. Indices are unmanaged and not available for direct investment.

Performance data quoted represents past performance and does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For more current performance information to the most recent month ended, please visit hartfordfunds.com.

Investors should carefully consider a fund's investment objectives, risks, charges and expenses. This and other important information is contained in a fund's full prospectus and summary prospectus, which can be obtained by visiting hartfordfunds.com. Please read it carefully before investing.

Effective 11/30/23, the Fund (formerly known as the Hartford Schrodgers Sustainable Core Bond Fund) changed its name, objective, and principal investment strategy. Returns prior to 11/30/23 reflect the performance of the Fund's prior modified objective and modified principal investment strategy.

Expenses (%)

	R3	R4	R5	SDR	Y
Gross	1.23	0.93	0.63	0.51	0.58
Net	1.06	0.76	0.46	0.36	0.40

Expenses are from the Fund's most recent prospectus at the time of publication. Gross expenses do not reflect contractual expense reimbursement arrangements. Net expenses reflect such arrangements in instances when they reduce gross expenses. These arrangements remain in effect until 2/28/26 unless the Fund's Board of Directors approves an earlier termination. Without these arrangements, performance would have been lower.

Credit exposure is the credit ratings for the underlying securities of the Fund as provided by S&P, Moody's, or Fitch and typically range from AAA/Aaa (highest) to C/D (lowest). If S&P, Moody's, and Fitch assign different ratings, the average rating is used. If only two ratings agencies assign ratings, the lower rating is used. Securities that are not rated by any of the three agencies are listed as "Not Rated". The ratings breakdown includes cash and cash equivalents. Ratings do not apply to the Fund itself or to Fund shares. Ratings may change.

Holdings and characteristics are subject to change. Percentages may be rounded.

Important Risks: Investing involves risk, including the possible loss of principal. Security prices fluctuate in value depending on general market and economic conditions and the prospects of individual companies. • Fixed income security risks include credit, liquidity, call, duration, and interest-rate risk. As interest rates rise, bond prices generally fall. • Obligations of U.S. Government agencies are supported by varying degrees of credit but are generally not backed by the full faith and credit of the U.S. Government. • Mortgage-related and asset-backed securities' risks include credit, interest-rate, prepayment, and extension risk. • Municipal securities may be adversely impacted by state/local, political, economic, or market conditions; these risks may be magnified if the Fund focuses its assets in municipal securities of issuers in a few select states. • The Fund may have high portfolio turnover, which could increase its transaction costs and an investor's tax liability. • The value of inflation-protected securities (IPS) generally fluctuates with changes in real interest rates, and the market for IPS may be less developed or liquid, and more volatile, than other securities markets. • The purchase of securities in the To-Be-Announced (TBA) market can result in higher portfolio turnover, which could increase transaction costs and an investor's tax liability. The risks associated with the TBA market include price and counterparty risk. • Foreign investments, including foreign government debt, may be more volatile and less liquid than U.S. investments and are subject to the risk of currency fluctuations and adverse political, economic and regulatory developments. • Derivatives are generally more volatile and sensitive to changes in market or economic conditions than other securities; their risks include currency, leverage, liquidity, index, pricing, valuation, and counterparty risk. • Financially material environmental, social and/or governance (ESG) characteristics are one of several factors that may be considered. The Fund may perform differently from funds that do not integrate ESG into their analysis. • Restricted securities may be more difficult to sell and price than other securities.

Effective Duration measures the sensitivity of an asset or portfolio's price to nominal interest rate movement. **30-Day SEC Yield** reflects the hypothetical net current income earned, after the deduction of a fund's expenses, during a 30-day period, expressed as an annual percentage rate based on the fund's share price at the end of the period. Actual income distributions will usually differ. **Unsubsidized 30-Day SEC Yield** is the Fund's 30-Day SEC yield without the impact of fee/expense waivers.
