Share Class Inception: R3, R4, R5, Y – 5/31/11; R6 – 11/7/14. Performance shown prior to the inception of a class reflects performance and operating expenses of another class(es). Had fees and expenses of a class been reflected for the periods prior to the inception of that class, performance would be different. Since inception (SI) performance is from 5/31/11. Performance and expenses for other share classes will vary. Additional information is in the prospectus.

Citigroup World Government Bond Index is a market-capitalization-weighted index consisting of government bond markets. Country eligibility is determined based on market capitalization and investability criteria. All issues have a remaining maturity of at least one year. This Index is unmanaged and not available for direct investment.

Calendar Year Returns (%) Y Shares

2017	2016	2015	2014	2013	2012
2.75	2.00	-0.15	3.17	-0.14	9.23

Performance data quoted represents past performance and does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For more current performance information to the most recent month ended, please visit hartfordfunds.com.

Investors should carefully consider a fund's investment objectives, risks, charges and expenses. This and other important information is contained in a fund's full prospectus and summary prospectus, which can be obtained by visiting hartfordfunds.com. Please read it carefully before investing.

Cash & Cash Offsets	7

[†]Credit exposure is the credit ratings for the underlying securities of the Fund as provided by Standard and Poor's (S&P), Moody's Investors Service, or Fitch and typically range from AAA/Aaa (highest) to C/D (lowest). If S&P, Moody's, and Fitch assign different ratings, the highest rating is used. If only two agencies assign ratings, the highest rating is used. Securities that are not rated by any of the three agencies are listed as "Not Rated." Ratings do not apply to the Fund itself or to Fund shares. Ratings may change.

Holdings and characteristics are subject to change. Percentages may be rounded.

Important Risks: Investing involves risk, including the possible loss of principal. The fund seeks to achieve its investment objective by allocating assets among specialist portfolio managers. There is no guarantee a fund will achieve its stated objective. Security prices fluctuate in value depending on general market and economic conditions and the prospects of individual companies. • Fixed income security risks include credit, liquidity, call, duration, and interest-rate risk. As interest rates rise, bond prices generally fall. • Obligations of U.S. Government agencies are supported by varying degrees of credit but are generally not backed by the full faith and credit of the U.S. Government. • Investments in high-yield ("junk") bonds involve greater risk of price volatility, illiquidity, and default than higher-rated debt securities. • Mortgage related- and asset-backed securities' risks include credit, interest-rate, prepayment, and extension risk. • Derivatives are generally more volatile and sensitive to changes in market or economic conditions than other securities; their risks include currency, leverage, liquidity, index, pricing, and counterparty risk. • Foreign investments may be more volatile and less liquid than U.S. investments and are subject to the risk of currency fluctuations and adverse political and economic developments. These risks may be greater for investments in emerging markets. • The fund may invest in a smaller number of issuers and focus on investments in particular geographic regions or countries, so it may be more exposed to risks and volatility than a more broadly diversified fund. • Privately placed, restricted (Rule 144A) securities may be more difficult to sell and price than other securities.

Effective Duration is a measure of the sensitivity of an investment's price to nominal interest-rate movement. **Years to Worst** is the average time until the earliest date when the principal of the bond can be repaid.
