Share Class Inception: R3, R4, R5, Y – 5/31/11; R6 – 11/7/14. Performance shown prior to the inception of a class reflects performance and operating expenses of another class(es). Had fees and expenses of a class been reflected for the periods prior to the inception of that class, performance would be different. Since inception (SI) performance is from 5/31/11. Performance and expenses for other share classes will vary. Additional information is in the prospectus.

Citigroup World Government Bond Index is a market-capitalization-weighted index consisting of government bond markets. Country eligibility is determined based on market capitalization and investability criteria. All issues have a remaining maturity of at least one year. This Index is unmanaged and not available for direct investment.

Calendar Year Returns (%) Y Shares

2017	2016	2015	2014	2013	2012
2.75	2.00	-0.15	3.17	-0.14	9.23

Performance data quoted represents past performance and does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For more current performance information to the most recent month ended, please visit hartfordfunds.com.

Investors should carefully consider a fund's investment objectives, risks, charges and expenses. This and other important information is contained in the fund's prospectus and summary prospectus (if available), which can be obtained by visiting hartfordfunds.com. Please read it carefully before investing.

Expenses (%)¹

	R3	R4	R5	R6	Y
Gross	1.40	1.08	0.81	0.72	0.72
Net	1.35	1.05	0.75	0.67	0.70

¹ Expenses stated as of the fund's most recent prospectus. Net expenses reflect contractual expense reimbursements in instances when these reductions reduce the fund's gross expenses. Contractual reimbursements remain in effect until 2/28/18 and automatically renew for one-year terms unless terminated. Certain contractual reimbursements for Class R6 and Class F shares remain in effect until 2/28/18.

Not Rated	1
Cash & Cash Offsets	9

[†]Credit exposure is the credit ratings for the underlying securities of the Fund as provided by Standard and Poor's (S&P), Moody's Investors Service, or Fitch and typically range from AAA/Aaa (highest) to C/D (lowest). If S&P, Moody's, and Fitch assign different ratings, the highest rating is used. If only two agencies assign ratings, the highest rating is used. Securities that are not rated by any of the three agencies are listed as "Not Rated." Ratings do not apply to the Fund itself or to Fund shares. Ratings may change.

Holdings and characteristics are subject to change. Percentages may be rounded.

Important Risks: All investments are subject to risk, including the possible loss of principal. There is no guarantee the Fund will achieve its stated objective. The Fund's share price may fluctuate due to market risk and/or security selections that may underperform the market or relevant benchmarks. If the Fund's strategy for allocating assets among different asset classes and/or portfolio management teams does not work as intended, the Fund may not achieve its objective or may underperform other funds with similar investment strategies. *Fixed Income* risks include credit, liquidity, call, duration, and interest-rate risk. As interest rates rise, bond prices generally fall; these risks are currently heightened because interest rates are at, or near, historical lows. *Obligations of U.S. Government agencies* are supported by varying degrees of credit but are generally not backed by the full faith and credit of the U.S. Government. Investments in *high-yield ("junk") bonds* involve greater risk of price volatility, illiquidity, and default than higher-rated debt securities. *Mortgage- and asset-backed securities'* risks include credit, interest-rate, prepayment, and extension risk. *Derivatives* may be riskier or more volatile than other types of investments because they are generally more sensitive to changes in market or economic conditions; risks include currency, leverage, liquidity, index, pricing, and counterparty risk. *Foreign investments* can be riskier and more volatile than U.S. investments due to the adverse effects of currency exchange rates, differences in market structure and liquidity, as well as political and economic developments in foreign countries and regions (e.g., "Brexit"). These risks are generally greater for investments in *emerging markets*. The Fund is *non-diversified*, so it may be more exposed to the risks associated with individual issuers than a diversified fund. *Privately placed, restricted (Rule 144A) securities* may be more difficult to sell and value than publicly traded securities, thus they may be potentially illiquid. The Fund may have *high portfolio turnover*, which could increase the Fund's transaction costs and an investor's tax liability.

Effective Duration is a measure of the sensitivity of an investment's price to nominal interest-rate movement. **Years to Worst** is the average time until the earliest date when the principal of the bond can be repaid.
