Share Class Inception: R3, R4, R5, Y - 5/31/11; R6 - 11/7/14. Performance shown prior to the inception of a class reflects performance and operating expenses of another class(es). Had fees and expenses of a class been reflected for the periods prior to the inception of that class, performance would be different. Since inception (SI) performance is from 5/31/11. Performance and expenses for other share classes will vary. Additional information is in the prospectus.

**FTSE World Government Bond Index** is a market-capitalization-weighted index consisting of government bond markets. Country eligibility is determined based on market capitalization and investability criteria. All issues have a remaining maturity of at least one year. Indices are unmanaged and not available for direct investment.

Cash & Cash Offsets	1

<sup>†</sup> Credit exposure is the credit ratings for the underlying securities of the Fund as provided by Standard and Poor's (S&P), Moody's Investors Service, or Fitch and typically range from AAA/Aaa (highest) to C/D (lowest). If S&P, Moody's, and Fitch assign different ratings, the highest rating is used. If only two agencies assign ratings, the highest rating is used. Securities that are not rated by any of the three agencies are listed as "Not Rated." Ratings do not apply to the Fund itself or to Fund shares. Ratings may change.

Holdings and characteristics are subject to change. Percentages may be rounded.

**Important Risks:** Investing involves risk, including the possible loss of principal. Security prices fluctuate in value depending on general market and economic conditions and the prospects of individual companies. The Fund may allocate a portion of its assets to specialist portfolio managers, which may not work as intended. • Fixed income security risks include credit, liquidity, call, duration, and interest-rate risk. As interest rates rise, bond prices generally fall. • Foreign investments, including foreign government debt, may be more volatile and less liquid than U.S. investments and are subject to the risk of currency fluctuations and adverse political, economic and regulatory developments. These risks may be greater, and include additional risks, for investments in emerging markets or if the Fund focuses in a particular geographic region or country. • Investments in high-yield ("junk") bonds involve greater risk of price volatility, illiquidity, and default than higher-rated debt securities. • Mortgage-related and asset-backed securities' risks include credit, interest-rate, prepayment, and extension risk. • Derivatives are generally more volatile and sensitive to changes in market or economic conditions than other securities; their risks include currency, leverage, liquidity, index, pricing, regulatory and counterparty risk. • Because the Fund is non-diversified, it may invest in a smaller number of issuers, and may be more exposed to risks and volatility than a more broadly diversified fund. • Restricted securities may be more difficult to sell and price than other securities. • Obligations of U.S. Government agencies are supported by varying degrees of credit but are generally not backed by the full faith and credit of the U.S. Government. • The Fund may have high portfolio turnover, which could increase its transaction costs and an investor's tax liability. • The purchase of securities in the To-Be-Announced (TBA) market can result in higher portfolio turnover and related expenses as well as price and counterparty risk. • Financially material environmental, social and/or governance (ESG) characteristics are one of several factors that may be considered and as a result, the investment process may not work as intended.

**Effective Duration** measures the sensitivity of an asset or portfolio's price to nominal interest rate movement.

The Hartford World Bond Fund is not promoted, sponsored or endorsed by, nor in any way affiliated with the London Stock Exchange Group plc and its group undertakings (collectively, the "LSE Group").
