Share Class Inception: A - 5/1/00; F - 2/28/17; I - 8/31/06. Performance shown prior to the inception of a class reflects performance and operating expenses of another class(es) (excluding sales charges, if applicable). Had fees and expenses of a class been reflected for the periods prior to the inception of that class, performance would be different. Since inception (SI) performance is from 5/1/00. Performance and expenses for other share classes will vary. Additional information is in the prospectus. Only Class A assesses a sales charge. Performance for periods of less than one year is not annualized.

Benchmark: S&P Composite 1500 Health Care Index comprises those companies included in the S&P Composite 1500 that are classified as members of the GICS health care sector. Indices are unmanaged and not available for direct investment.

Important Risks: Investing involves risk, including the possible loss of principal. Security prices fluctuate in value depending on general market and economic conditions and the prospects of individual companies. • Risks of focusing investments on the healthcare related sector include regulatory and legal developments, changes in funding or subsidies, patent and intellectual property considerations, intense competitive pressures, rapid technological changes, long and costly process for obtaining product approval by government agencies, potential product obsolescence, rising cost of medical products and services, and price volatility risk. • Small- and mid-cap securities can have greater risks and volatility than large-cap securities. • The securities of large market capitalization companies may underperform other segments of the market. • Foreign investments may be more volatile and less liquid than U.S. investments and are subject to the risk of currency fluctuations and adverse political, economic and regulatory developments.

Beta measures the volatility of a portfolio relative to a benchmark. A beta of less than 1.00 indicates lower risk than the market; a beta of greater than 1.00 indicates higher risk than the market. **R Squared** represents the percentage of the portfolio's movement that can be explained by the market. **Standard Deviation** measures the portfolio's total-return volatility. A higher standard deviation indicates greater historical volatility. **Turnover** is a measure of the Fund's trading activity which represents the portion of the Fund's holdings that has changed over a twelve-month period through the Fund's fiscal year end. Turnover shown excludes To-Be-Announced roll transactions, if any. **Price/Earnings** is the ratio of a stock's price to its earnings per share. **Price/Book** is the ratio of a stock's price to its book value per share. **EPS Growth Rate** is the projected growth rate in earnings per share for the next five years. **Return on Equity** is the average amount of net income returned as a percentage of shareholder's equity over the past five years. **Asset Weighted Market Cap** is the value of a corporation as determined by the number of outstanding shares of common stock multiplied by the price per share.
