Share Class Inception: A, Y - 7/22/96; F - 2/28/17; I - 3/31/15. Performance shown prior to the inception of a class reflects performance and operating expenses of another class(es) (excluding sales charges, if applicable). Had fees and expenses of a class been reflected for the periods prior to the inception of that class, performance would be different. Since inception (SI) performance is from 7/22/96. Performance and expenses for other share classes will vary. Additional information is in the prospectus. Only Class A assesses a sales charge.

The blended benchmark consists of 55% Bloomberg Barclays U.S. Aggregate Bond Index and 45% S&P 500 Index. Indices are unmanaged and not available for direct investment.

Performance data quoted represents past performance and does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For more current performance information to the most recent month ended, please visit hartfordfunds.com.

Investors should carefully consider a fund's investment objectives, risks, charges and expenses. This and other important information is contained in a fund's full prospectus and summary prospectus, which can be obtained by visiting hartfordfunds.com. Please read it carefully before investing.

Effective 4/30/21, the Fund (formerly known as the Hartford Multi-Asset Income and Growth Fund) changed its name to the Hartford Multi-Asset Income Fund.

Effective 5/1/19, the Fund changed its objective, principal investment strategy and benchmark. Returns prior to 5/1/19 reflect the performance of the Fund's prior strategy. Please see the Fund's prospectus for additional information.

<sup>1</sup> Expenses as shown in the Fund's most recent prospectus.

Mutual funds are distributed by Hartford Funds Distributors, LLC (HFD), Member FINRA. Advisory services are provided by Hartford Funds Management Company, LLC (HFMC). Certain funds are sub-advised by Wellington Management Company LLP. HFD and HFMC are not affiliated with any sub-adviser.

**Global Income Low Volatility Equities** invests in securities that Wellington Management believes exhibit low volatility. **Thematic Equities** invest in securities based on Wellington's macroeconomic and structural trends derived from proprietary research.

Holdings and characteristics are subject to change. Percentages may be rounded.

**Important Risks:** Investing involves risk, including the possible loss of principal. Security prices fluctuate in value depending on general market and economic conditions and the prospects of individual companies. The Fund may allocate a portion of its assets to specialist portfolio managers, which may not work as intended. • Fixed income security risks include credit, liquidity, call, duration, and interest-rate risk. As interest rates rise, bond prices generally fall. • Investments in Equity Linked Notes (ELNs) are subject to interest, credit, management, counterparty, liquidity, and market risks, and as applicable, foreign security and currency risks. • Loans can be difficult to value and less liquid than other types of debt instruments; they are also subject to nonpayment, collateral, bankruptcy, default, extension, prepayment and insolvency risks. • Investments in high-yield ("junk") bonds involve greater risk of price volatility, illiquidity, and default than higher-rated debt securities. • Obligations of U.S. Government agencies are supported by varying degrees of credit but are generally not backed by the full faith and credit of the U.S. Government. • Foreign investments may be more volatile and less liquid than U.S. investments and are subject to the risk of currency fluctuations and adverse political, economic and regulatory developments. These risks may be greater for investments in emerging markets. • Derivatives are generally more volatile and sensitive to changes in market or economic conditions than other securities; their risks include currency, leverage, liquidity, index, pricing, regulatory and counterparty risk. • Mortgage-related and asset-backed securities' risks include credit, interest-rate, prepayment, and extension risk. • Restricted securities may be more difficult to sell and price than other securities. • For dividend-paying stocks, dividends are not guaranteed and may decrease without notice. • Investments in ETFs are subject to the risks that apply to the ETF's strategies and portfolio holdings.

**Asset Weighted Market Cap** is the value of a corporation as determined by the number of outstanding shares of common stock multiplied by the price per share. **Effective Duration** measures the sensitivity of an asset or portfolio's price to nominal interest rate movement. **EPS Growth Rate** is the projected growth rate in earnings per share for the next five years. **Price/Earnings** is the ratio of a stock's price to its earnings per share. **Return on Equity** is the average amount of net income returned as a percentage of shareholder's equity over the past five years. **Standard Deviation** measures the portfolio's total-return volatility. A higher standard deviation indicates greater historical volatility.
