Share Class Inception: A, I - 5/28/10; F - 2/28/17. Performance shown prior to the inception of a class reflects performance and operating expenses of another class(es) (excluding sales charges, if applicable). Had fees and expenses of a class been reflected for the periods prior to the inception of that class, performance would be different. Since inception (SI) performance is from 5/28/10. Performance and expenses for other share classes will vary. Additional information is in the prospectus. Only Class A assesses a sales charge. Performance for periods of less than one year is not annualized.

Benchmark: The Blended Index consists of 40% Bloomberg US TIPS 1-10 Year Index, 30% MSCI ACWI Commodity Producers Index, 10% Bloomberg Commodity Index Total Return, 10% MSCI World IMI Core Real Estate Index and 10% MSCI ACWI Infrastructure Index. Indices are unmanaged and not available for direct investment.

### Expenses (%)

	I	F	A
Gross	1.26	1.16	1.54
Net	1.01	0.91	1.26

Expenses are from the Fund's most recent prospectus at the time of publication. Gross expenses do not reflect contractual expense reimbursement or fee waiver arrangements. Net expenses reflect such arrangements in instances when they reduce gross expenses. The expense reimbursement arrangement remains in effect until 2/28/26 unless the Fund's Board of Directors approves an earlier termination. The fee waiver related to the Fund's investment in its Cayman Islands subsidiary remains in effect for as long as the Fund remains invested in the subsidiary. Without these arrangements, performance would have been lower.

**Important Risks:** Investing involves risk, including the possible loss of principal. Security prices fluctuate in value depending on general market and economic conditions and the prospects of individual companies. • The portfolio managers may allocate a portion of the Fund's assets to specialist portfolio managers, and among different asset classes, each of which may not work as intended. • Investments in the commodities market and the natural-resource industry may increase the Fund's liquidity risk, volatility and risk of loss if adverse developments occur. Investments linked to prices of commodities may be considered speculative. • Fixed income security risks include credit, liquidity, call, duration, and interest-rate risk. As interest rates rise, bond prices generally fall. • Foreign investments may be more volatile and less liquid than U.S. investments and are subject to the risk of currency fluctuations and adverse political, economic and regulatory developments. These risks may be greater, and include additional risks, for investments in emerging markets. • Derivatives are generally more volatile and sensitive to changes in market or economic conditions than other securities; their risks include currency, leverage, liquidity, index, pricing, valuation, and counterparty risk. • By investing in a Cayman subsidiary, the Fund is indirectly exposed to the risks associated with a non-U.S. subsidiary and its investments. • The Fund's investments may fluctuate in value over a short period of time. • The value of the underlying real estate of real estate related securities may go down due to various factors, including but not limited to, strength of the economy, amount of new construction, laws and regulations, costs of real estate, availability of mortgages and changes in interest rates. • The value of inflation-protected securities (IPS) generally fluctuates with changes in real interest rates, and the market for IPS may be less developed or liquid, and more volatile, than other securities markets. • Obligations of U.S. Government agencies are supported by varying degrees of credit but are generally not backed by the full faith and credit of the U.S. Government. • The Fund may have high portfolio turnover, which could increase its transaction costs and an investor's tax liability.

**Standard Deviation** measures the portfolio's total-return volatility. A higher standard deviation indicates greater historical volatility.
