MSCI EAFE Value Index is a free-float weighted index. The Index represents the securities classified as "value" securities by MSCI that are members of the MSCI EAFE Index. The MSCI EAFE region covers developed-market countries in Europe, Australasia, and the Far East. MSCI index performance is shown net of dividend withholding tax. Indices are unmanaged and not available for direct investment.

Performance data quoted represents past performance and does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For more current performance information to the most recent month ended, please visit hartfordfunds.com.

Investors should carefully consider a fund's investment objectives, risks, charges and expenses. This and other important information is contained in a fund's full prospectus and summary prospectus, which can be obtained by visiting hartfordfunds.com. Please read it carefully before investing.

Holdings and characteristics are subject to change. Percentages may be rounded.

Important Risks: The Fund is new and has a limited operating history. Investing involves risk, including the possible loss of principal. Security prices fluctuate in value depending on general market and economic conditions and the prospects of individual companies. • Foreign investments may be more volatile and less liquid than U.S. investments and are subject to the risk of currency fluctuations and adverse political, economic and regulatory developments. These risks may be greater, and include additional risks, for investments in emerging markets or if the Fund focuses in a particular geographic region or country. • Mid-cap securities can have greater risks and volatility than large-cap securities. • Integration of environmental, social, and/or governance (ESG) characteristics into the investment process may not work as intended. • Different investment styles may go in and out of favor, which may cause the Fund to underperform the broader stock market. • To the extent the Fund focuses on one or more sectors, the Fund may be subject to increased volatility and risk of loss if adverse developments occur. The Fund may also hold a limited number of securities.

Asset Weighted Market Cap is the value of a corporation as determined by the number of outstanding shares of common stock multiplied by the price per share. **Price/Book** is the ratio of a stock's price to its book value per share. **Price/Earnings** is the ratio of a stock's price to its earnings per share. **Return on Equity** is the average amount of net income returned as a percentage of shareholder's equity over the past five years.
