Share Class Inception: A, Y - 4/30/01; F - 2/28/17; I - 8/31/06. Performance shown prior to the inception of a class reflects performance and operating expenses of another class(es) (excluding sales charges, if applicable). Had fees and expenses of a class been reflected for the periods prior to the inception of that class, performance would be different. Since inception (SI) performance is from 4/30/01. Performance and expenses for other share classes will vary. Additional information is in the prospectus. Only Class A assesses a sales charge.

**MSCI ACWI ex USA Growth Index** is a free-float adjusted market-cap weighted index designed to capture large- and mid-cap securities that exhibit overall growth style characteristics across developed and emerging market countries, excluding the U.S. MSCI index performance is shown net of dividend withholding tax. Indices are unmanaged and not available for direct investment.

2012	19.54

Performance data quoted represents past performance and does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For more current performance information to the most recent month ended, please visit hartfordfunds.com.

Investors should carefully consider a fund's investment objectives, risks, charges and expenses. This and other important information is contained in a fund's full prospectus and summary prospectus, which can be obtained by visiting hartfordfunds.com. Please read it carefully before investing.

<sup>1</sup> Expenses as shown in the Fund's most recent prospectus. Gross expenses do not reflect contractual expense reimbursement arrangements. Net expenses reflect such arrangements in instances when they reduce gross expenses. These arrangements remain in effect until 2/28/22 unless the Fund's Board of Directors approves an earlier termination.

Mutual funds are distributed by Hartford Funds Distributors, LLC (HFD), Member FINRA. Advisory services are provided by Hartford Funds Management Company, LLC (HFMC). Certain funds are sub-advised by Wellington Management Company LLP. HFMC and Wellington Management are SEC registered investment advisers. HFD and HFMC are not affiliated with any sub-adviser.

Holdings and characteristics are subject to change. Percentages may be rounded.

**Important Risks:** Investing involves risk, including the possible loss of principal. Security prices fluctuate in value depending on general market and economic conditions and the prospects of individual companies. • Foreign investments may be more volatile and less liquid than U.S. investments and are subject to the risk of currency fluctuations and adverse political, economic and regulatory developments. These risks may be greater, and include additional risks, for investments in emerging markets. • Small- and mid-cap securities can have greater risks and volatility than large-cap securities. • The Fund may focus on investments in particular sectors, geographic regions or countries, so it may be more exposed to risks and volatility than a fund holding more geographically diverse investments. • Different investment styles may go in and out of favor, which may cause the Fund to underperform the broader stock market. • The Fund may have high portfolio turnover, which could increase its transaction costs and an investor's tax liability.

**Asset Weighted Market Cap** is the value of a corporation as determined by the number of outstanding shares of common stock multiplied by the price per share. **Beta** measures the volatility of a portfolio relative to a benchmark. A beta of less than 1.00 indicates lower risk than the market; a beta of greater than 1.00 indicates higher risk than the market. **EPS Growth Rate** is the projected growth rate in earnings per share for the next five years. **Price/Book** is the ratio of a stock's price to its book value per share. **Price/Earnings** is the ratio of a stock's price to its earnings per share. **Return on Equity** is the average amount of net income returned as a percentage of shareholder's equity over the past five years. **R Squared** represents the percentage of the portfolio's movement that can be explained by the market. **Standard Deviation** measures the portfolio's total-return volatility. A higher standard deviation indicates greater historical volatility. **Turnover** is a percentage of a portfolio's assets that have changed over the course of a year. It is calculated by dividing the average assets during the period by the lesser of the value of purchases or the value of sales during the same period.
