Share Class Inception: A, Y - 2/19/02; F - 2/28/17; I - 8/31/06. Performance shown prior to the inception of a class reflects performance and operating expenses of another class(es) (excluding sales charges, if applicable). Had fees and expenses of a class been reflected for the periods prior to the inception of that class, performance would be different. Since inception (SI) performance for A is from 1/4/88; F, I, and Y is from 2/19/02. Performance and expenses for other share classes will vary. Additional information is in the prospectus. Only Class A assesses a sales charge.

Russell 2000 Growth Index is an unmanaged index of those Russell 2000 Index growth companies with higher price-to-book ratios and higher forecasted growth values. Indices are unmanaged and not available for direct investment.

Holdings and characteristics are subject to change. Percentages may be rounded.

Important Risks: Investing involves risk, including the possible loss of principal. There is no guarantee a fund will achieve its stated objective. Security prices fluctuate in value depending on general market and economic conditions and the prospects of individual companies. • Small-cap securities can have greater risks and volatility than large-cap securities. • The Fund's focus on investments in particular sectors may increase its volatility and risk of loss if adverse developments occur. • Different investment styles may go in and out favor, which may cause a fund to underperform the broader stock market.

Asset Weighted Market Cap is the value of a corporation as determined by the number of outstanding shares of common stock multiplied by the price per share. **Beta** measures the volatility of a portfolio relative to a benchmark. A beta of less than 1.00 indicates lower risk than the market; a beta of greater than 1.00 indicates higher risk than the market. **EPS Growth Rate** is the projected growth rate in earnings per share for the next five years. **Price/Book** is the ratio of a stock's price to its book value per share. **Price/Earnings** is the ratio of a stock's price to its earnings per share. **R Squared** represents the percentage of the portfolio's movement that can be explained by the market. **Return on Equity** is the average amount of net income returned as a percentage of shareholder's equity over the past five years. **Standard Deviation** measures the portfolio's total-return volatility. A higher standard deviation indicates greater historical volatility.
