Share Class Inception: A, I - 3/31/06; F - 2/28/17; Y - 10/24/16. Share class performance prior to 10/24/16 reflects the performance of the predecessor fund. Performance shown prior to the inception of a class reflects performance and operating expenses of another class(es) (excluding sales charges, as applicable). Had fees and expenses of a class been reflected for the periods prior to the inception of that class, performance would be different. Since inception (SI) performance is from 3/31/06. Performance and expenses for other share classes will vary. Additional information is in the prospectus. Only Class A assesses a sales charge.

**MSCI Emerging Markets Index** is a free float-adjusted market capitalization-weighted index that is designed to measure equity market performance in the global emerging markets. MSCI index performance is shown net of dividend withholding tax. Indices are unmanaged and not available for direct investment.

\*Class I-Shares Star Ratings: 3-year 4 stars out of 701 products, 5-year 4 stars out of 569 products, and 10-year 3 stars out of 243 products for the period ended herein. Other share classes may have different ratings. The Morningstar Rating™ for funds, or "star rating", is calculated for funds and separate accounts with at least a 3-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. Star rating based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance (without adjusting for any sales load, if applicable), placing more emphasis on downward variations and rewarding consistent performance. 5 stars are assigned to the top 10%, 4 stars to the next 22.5%, 3 stars to the next 35%, 2 stars to the next 22.5%, and 1 star to the bottom 10%. Overall Morningstar Rating is derived from a weighted average of the performance figures associated with its 3-, 5-, and 10-year (if applicable) Morningstar Rating metrics. **Important Risks:** Investing involves risk, including the possible loss of principal. Security prices fluctuate in value depending on general market and economic conditions and the prospects of individual companies. • Foreign investments may be more volatile and less liquid than U.S. investments and are subject to the risk of currency fluctuations and adverse political and economic developments. These risks may be greater for investments in emerging markets or if the Fund focuses in a particular geographic region or country. • Small- and mid-cap securities can have greater risks and volatility than large-cap securities. • The Fund's focus on investments in particular sectors may increase its volatility and risk of loss if adverse developments occur.

**Asset Weighted Market Cap** is the value of a corporation as determined by the number of outstanding shares of common stock multiplied by the price per share. **Beta** measures the volatility of a portfolio relative to a benchmark. A beta of less than 1.00 indicates lower risk than the market; a beta of greater than 1.00 indicates higher risk than the market. **Price/Book** is the ratio of a stock's price to its book value per share. **Price/Earnings** is the ratio of a stock's price to its earnings per share. **R Squared** represents the percentage of the portfolio's movement that can be explained by the market. **Return on Equity** is the average amount of net income returned as a percentage of shareholder's equity over the past five years. **Standard Deviation** measures the portfolio's total-return volatility. A higher standard deviation indicates greater historical volatility. **Turnover** is a percentage of a portfolio's assets that have changed over the course of a year. It is calculated by dividing the average assets during the period by the lesser of the value of purchases or the value of sales during the same period.
