

Seeking International Growth with Lower Volatility

RODM

Provides deep and diverse exposure across international developed markets and economies.

ETF That Seeks Outperformance

RODM is a research-driven, rules-based strategy that differs from traditional passive funds because it has the flexibility to go beyond benchmark weights and exposures, avoiding concentration in mega-cap, multinational companies.

Smart Exposure for Growth

Using a comprehensive approach, RODM focuses on developed international equities that meet specific characteristics—high-quality, attractively priced, recognized by the market—which can potentially enhance returns.

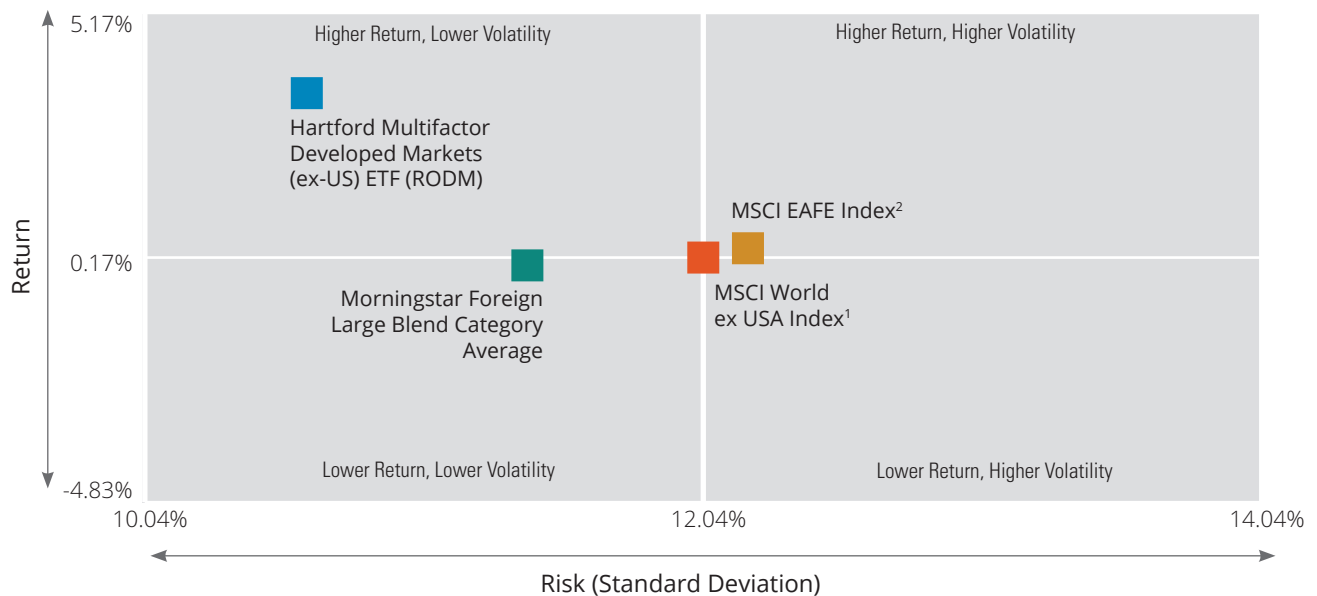

Lower Volatility

The Fund strives for broad diversification across international countries and economies, all while targeting 15% less volatility. The process has resulted in strong performance with less risk.

15% Volatility Reduction Target*

Historical Outperformance with Lower Relative Risk

Risk/Return Comparison (3/1/15-12/31/18)

Fund Objective: Seeks to provide investment results that, before fees and expenses, correspond to the total return performance of the Hartford Risk-Optimized Multifactor Developed Markets (ex-US) Index, which tracks the performance of companies located in major developed markets of Europe, Canada, and the Pacific Region

*The strategy seeks to achieve a volatility reduction target up to the amount noted over a market cycle relative to a market-cap weighted index. There is no guarantee that a fund will achieve its investment objective. Source: Hartford Funds.

Standard deviation is a statistical measure of risk that indicates the historical volatility of an investment's returns.

Past performance is not indicative of future results. The performance shown above is index performance. Indices are unmanaged and not available for direct investment.

Performance data quoted represents past performance and does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For more current performance information to the most recent month ended, please see hartfordfunds.com.

Hartford Multifactor ETF shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Total returns are calculated using the daily 4:00 p.m. Eastern Time net asset value (NAV). Market price returns reflect the midpoint of the bid/ask spread as of the close of trading on the exchange where Fund shares are listed. Market price returns do not represent the returns an investor would receive if they traded shares at other times. Investors may acquire ETF Shares and tender them for redemption through the Fund in Creation Unit Aggregations only. Please see the prospectus for more details. *Brokerage commissions apply and will reduce returns.*

Investing involves risk, including the possible loss of principal. There is no guarantee a fund will achieve its stated objective. Security prices fluctuate in value depending on general market and economic conditions and the prospects of individual companies. • Foreign investments may be more volatile and less liquid than U.S. investments and are subject to the risk of currency fluctuations and adverse political and economic developments. • Diversification does not eliminate the risk of experiencing investment losses. • Due to its investment strategy, the fund may make higher capital gain distributions than other ETFs.

¹ MSCI World ex USA Index captures large and mid cap representation across developed market countries, excluding the U.S.

² MSCI EAFE Index (Europe, Australasia, Far East) is a free float-adjusted capitalization index that is designed to measure developed market equity performance, and excludes the US and Canada.

³ Class I-Share Star Ratings: 3-year 5 stars out of 639 products for the period ended herein. The Morningstar Rating™ for funds, or "star rating", is calculated for funds and separate accounts with at least a 3-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. Star rating based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance (without adjusting for any sales load, if applicable), placing more emphasis on downward variations and rewarding consistent performance. 5 stars are assigned to the top 10%, 4 stars to the next 22.5%, 3 stars to the next 35%, 2 stars to the next 22.5%, and 1 star to the bottom 10%. Overall Morningstar Rating is derived from a weighted average of the performance figures associated with its 3-, 5-, and 10-year (if applicable) Morningstar Rating metrics. For more information about the Morningstar Fund Ratings, including their methodology, please go to global.morningstar.com/ manager disclosures. © 2019 Morningstar, Inc. All rights reserved.
