Because the most important factor is you
The Hartford Funds suite of multifactor ETFs is designed to help you navigate a potential lower-growth, higher-volatility market going forward.

ETFs That Seek Outperformance
Our research-driven, rules-based strategies differ from traditional passive funds that are limited to investing based strictly on company size.

Enhance Growth Potential
Using a comprehensive approach, we emphasize high-quality companies, trading at attractive prices, that are being recognized by the market.

Improve Diversification
Our strategies seek to track indices designed to reduce concentrated exposures to individual countries, companies, and sectors.

Factors are the “building blocks” of securities which can explain the drivers of risk and return. Hartford Funds focuses on value, momentum, and quality factors for enhanced return potential. Diversification does not eliminate the risk of loss.
* The strategy seeks to achieve a volatility reduction target up to the amount noted over a complete market cycle. There is no guarantee that a fund will achieve its investment objective. Source: Hartford Funds.
** Expenses are the total annual fund operating expenses as shown in the most recent prospectus.
“Can I put the emerging back into emerging markets while minimizing risk?”

ROAM Emerging Markets ETF
Reduces concentration and broadens core exposure to more countries, currencies, and companies

“How can I invest in the growth potential of international developed markets while also reducing volatility?”

ROGS Global Small Cap ETF
The first-ever ETF to provide exposure to small-cap companies around the globe*

“How can I access the growth potential of US REITs while reducing concentration risk?”

RORE REIT ETF
Seeks to diversify across property types and invests deeper into the US REIT universe, where there may be more opportunity for growth

“Are the risks I’m taking in the US market worth taking?”

ROUS US Equity ETF
Deepens exposure to the large-cap universe by de-emphasizing mega caps

Overall Morningstar Rating™:
Out of 1,096 products in the Large Value Category Based on Risk-Adjusted Returns as of 3/31/2019

“How can I tap into international or domestic markets with up to 25% less volatility?”

LVIN Low Volatility International Equity ETF
Seeks the performance potential of international equities with up to 25% less volatility³

LVUS Low Volatility US Equity ETF
Seeks the performance potential of US equities with up to 25% less volatility³

Investors should carefully consider a fund's investment objectives, risks, charges and expenses. This and other important information is contained in a fund’s full prospectus and summary prospectus, which can be obtained by visiting hartfordfunds.com. Please read it carefully before investing.

Investing involves risk, including the possible loss of principal. • Foreign investments may be more volatile and less liquid than U.S. investments and are subject to the risk of currency fluctuations and adverse political and economic developments. These risks may be greater for investments in emerging markets. • Small cap securities can have greater risk and volatility than large-cap securities. • A concentration in real estate securities, such as REITs, may subject a fund to risks associated with the direct ownership of real estate as well as the risks related to the way real estate companies are organized and operated. Real estate is sensitive to changes in interest rates and general and local economic conditions and developments. • The Funds are not actively managed but rather attempt to track the performance of an index. The Funds’ returns may diverge from that of the index. Ordinary brokerage commissions apply.

1 RODM Morningstar Ratings: Foreign Large Blend category (as of 3/31/19): 3-year 5 stars out of 644 products.
2 ROUS Morningstar Ratings: Large Value category (as of 3/31/19): 3-year 4 stars out of 1,096 products.

The Morningstar Rating™ for funds, or “star rating”, is calculated for funds and separate accounts with at least a 3-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. Star rating based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product’s monthly excess performance (without adjusting for any sales load, if applicable), placing more emphasis on downward variations and rewarding consistent performance. 5 stars are assigned to the top 10%, 4 stars to the next 22.5%, 3 stars to the next 35%, 2 stars to the next 22.5%, and 1 star to the bottom 10%. Overall Morningstar Rating is derived from a weighted average of the performance figures associated with its 3-, 5-, and 10-year (if applicable) Morningstar Rating metrics. For more information about the Morningstar Fund Ratings, including their methodology, please go to global.morningstar.com/managerdisclosures. Ratings are subject to change monthly. Past performance is no guarantee of future performance. © 2019 Morningstar, Inc. All rights reserved.
