Designed for Results

The Hartford Balanced Income Fund is a simple strategy designed to offer the growth potential investors need without taking excessive risk.

Invests in a Mix of Stocks and Bonds

The Fund targets a balanced allocation of 45% stocks and 55% bonds, with fluctuations of no more than +/- 5%. The stocks can provide growth potential, while the bonds can provide income and help reduce volatility.

Companies You Know and Trust

Dividend-paying stocks and investment-grade corporate bonds provide investments that you can feel confident investing in for the long run. A small, flexible allocation to high-yield bonds and emerging market debt helps enhance returns and income.

Strong Performance With Lower Volatility

The Fund has generated strong long-term performance, providing investors with significantly better returns during the market's most notable periods of volatility.
