Diversification Benefits of Bank Loans

An allocation to bank loans may help investors improve the asset mix within their fixed-income portfolios.

Diversification and Attractive Yield

Hartford Floating Rate Fund may offer a higher yield than many traditional fixed-income asset classes. It also has a lower correlation when compared to traditional bonds.

3.22% 30-Day SEC Yield
as of 12/31/20

A Hedge Against Rising Rates

The prices of traditional bonds generally drop as interest rates rise. This happens because as new bonds are issued at higher rates, existing bonds with lower rates become less attractive to investors, causing them to drop in value.

The Fund invests in bank loans with yields that adjust their interest rates every 30, 60, or 90 days, so they may be less affected by rising interest rates.

Experienced Management

Bank loans are a smaller asset class than many other types of bonds, which makes them difficult for individual investors to access. The Fund's management team averages more than 25 years of investment experience and is backed by the full resources of sub-adviser Wellington Management.

The Fund Performed Well During Periods of Rising Interest Rates...

Rising Rate Time Period	Excess Fund Returns (%) Over Traditional Bonds ¹
6/2/05-6/12/07	5.42
3/17/08-6/13/08	7.19
12/18/08-4/5/10	32.97
10/6/10-2/8/11	7.75
9/22/11-10/27/11	3.73
12/19/11-3/19/12	4.45
7/25/12-12/31/13	7.52
1/30/15-6/10/15	5.55
2/11/16-3/11/16	2.64
7/5/16-3/13/17	11.07
9/7/17-11/8/18	6.70
8/28/19-11/8/19	1.89
4/21/20-6/5/20	5.91
8/4/20-12/31/20	5.35

Rising rate periods are defined as periods with a 20% change in treasury yields over a least a 30 day period.

Past performance does not guarantee future results. The performance shown above is index performance. Indices are unmanaged and not available for direct investment. See back page for representative index definitions.

Investors should carefully consider a fund's investment objectives, risks, charges and expenses. This and other important information is contained in the fund's prospectus and summary prospectus, which can be obtained by visiting hartfordfunds.com. Please read it carefully before investing.

...And May Increase Fixed-Income Diversification

Correlation (5/1/05-12/31/20)

Correlation is a statistical measure of how two investments move in relation to each other. A correlation of 1.0 indicates the investments have historically moved in the same direction; a correlation of -1.0 means the investments have historically moved in opposite directions; and a correlation of 0 indicates no historical relationship in the movement of the investments.

Credit exposure is the credit ratings for the underlying securities of the Fund as provided by Standard and Poor's (S&P), Moody's Investors Service, or Fitch and typically range from AAA/Aaa (highest) to C/D (lowest). If S&P, Moody's, and Fitch assign different ratings, the median rating is used. If only two agencies assign ratings, the lower rating is used. Securities that are not rated by any of the three agencies are listed as "Not Rated." Ratings do not apply to the Fund itself or to Fund shares. Ratings may change.

Performance data quoted represents past performance and does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For more current performance information to the most recent month ended, please see hartfordfunds.com.

Fund Inception: 4/29/05. Share Class Inception: 8/31/06. Class I-share performance prior to its inception date reflects Class A-share performance (excluding sales charges) and operating expenses. Since Inception performance is calculated from 4/29/05.

* Class I-Share Star Ratings: 3-year 3 stars out of 232 products, 5-year 4 stars out of 207 products, and 10-year 4 stars out of 96 products for the period ended herein. Other share classes may have different ratings. The Morningstar Rating™ for funds, or "star rating", is calculated for funds and separate accounts with at least a 3-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. Star rating based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance (without adjusting for any sales load, if applicable), placing more emphasis on downward variations and rewarding consistent performance. 5 stars are assigned to the top 10%, 4 stars to the next 22.5%, 3 stars to the next 35%, 2 stars to the next 22.5%, and 1 star to the bottom 10%. Overall Morningstar Rating is derived from a weighted average of the performance figures associated with its 3-, 5-, and 10-year (if applicable) Morningstar Rating metrics. Important Risks: Investing involves risk, including the possible loss of principal. Security prices fluctuate in value depending on general market and economic conditions and the prospects of individual companies. • Loans can be difficult to value and less liquid than other types of debt instruments; they are also subject to nonpayment, collateral, bankruptcy, default, extension, prepayment and insolvency risks. • Fixed income security risks include credit, liquidity, call, duration, event and interest-rate risk. As interest rates rise, bond prices generally fall. • Investments in high-yield ("junk") bonds involve greater risk of price volatility, illiquidity, and default than higher-rated debt securities. • Derivatives are generally more volatile and sensitive to changes in market or economic conditions than other securities; their risks include currency, leverage, liquidity, index, pricing, and counterparty risk. • Foreign investments may be more volatile and less liquid than U.S. investments and are subject to the risk of currency fluctuations and adverse political and economic developments. *The Fund should not be considered an alternative to CDs or money market funds. This Fund is intended for investors who are looking to complement their traditional fixed-income investments.*

¹ Bloomberg Barclays U.S. Aggregate Bond Index is composed of securities from the Bloomberg Barclays Government/Credit Bond Index, Mortgage-Backed Securities Index, Asset-Backed Securities Index, and Commercial Mortgage-Backed Securities Index.

² ICE BofAML U.S. 3-Month Treasury Bill Index is an index of short-term U.S. Government securities with a remaining term to final maturity of less than three months.

³ Bloomberg Barclays U.S. Treasury Index is an unmanaged index of prices of U.S. Treasury bonds with maturities of one to 30 years.

⁴ S&P/LSTA Leveraged Loan Index is a market-value-weighted index that is designed to measure the performance of the U.S. leverage loan market based upon market weightings, spreads and interest payments.

Index provider notices may be found at hartfordfunds.com/index-notices.

⁵ Expenses as shown in the Fund's most recent prospectus. Gross expenses do not reflect contractual fee waivers or expense reimbursement arrangements. Net expenses reflect such arrangements in instances when they reduce gross expenses. These arrangements remain in effect until at least 2/28/21.

⁶ 30-Day SEC Yield reflects the hypothetical net current income earned, after the deduction of a fund's expenses, during a 30-day period, expressed as an annual percentage rate based on the fund's share price at the end of the period. Actual income distributions will usually differ. Unsubsidized 30-Day SEC Yield is the Fund's 30-Day SEC yield without the impact of fee/expense waivers.
