A Long-Term, Diversified Approach to Bond Investing

Hartford Total Return Bond Fund invests across multiple sectors and styles within the fixed-income market.

Actively Managed Fixed Income

Active portfolio managers can invest in the compelling opportunities as interest rates and credit conditions change. The Fund invests mostly in high-quality bonds but may also invest in lower-quality securities in an effort to enhance returns.

Combines Complementary Sectors

The investment team builds a portfolio with a diverse mix of fixed-income sectors that are expected to complement one another, with the aim of delivering consistent returns over a variety of market environments.

Expertise and Skill at a Reasonable Cost

Active investing doesn't have to break the bank. The Fund's I share class ranks in the lowest quartile for fees versus its peers in the Morningstar Broad Fee Level Group.

Performance data quoted represents past performance and does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For more current performance information to the most recent month ended, please visit hartfordfunds.com.

Investors should carefully consider a fund's investment objectives, risks, charges, and expenses. This and other important information is contained in a fund's full prospectus and summary prospectus, which can be obtained by visiting hartfordfunds.com. Please read it carefully before investing.

Credit exposure is the credit ratings for the underlying securities of the Fund as provided by Standard and Poor's (S&P), Moody's Investors Service, or Fitch and typically range from AAA/Aaa (highest) to C/D (lowest). If S&P, Moody's, and Fitch assign different ratings, the median rating is used. If only two agencies assign ratings, the lower rating is used. Securities that are not rated by any of the three agencies are listed as "Not Rated." Ratings do not apply to the Fund itself or to Fund shares. Ratings may change.

*Class I-Shares Star Ratings: 3-year 3 stars out of 530 products, 5-year 3 stars out of 478 products, and 10-year 4 stars out of 346 products for the period ended herein. Other share classes may have different ratings. The Morningstar Rating™ for funds, or "star rating", is calculated for funds and separate accounts with at least a 3-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. Star rating based on a Morningstar Risk Adjusted Return measure that accounts for variation in a managed product's monthly excess performance (without adjusting for any sales load, if applicable), placing more emphasis on downward variations and rewarding consistent performance. 5 stars are assigned to the top 10%, 4 stars to the next 22.5%, 3 stars to the next 35%, 2 stars to the next 22.5%, and 1 star to the bottom 10%. Overall Morningstar Rating is derived from a weighted average of the performance figures associated with its 3-, 5-, and 10-year (if applicable) Morningstar Rating metrics. ¹ Bloomberg US Aggregate Bond Index is composed of securities that covers the US investment grade fixed rate bond market, with index components for government and corporate securities, mortgage pass-through securities, and asset-backed securities.

² Expenses are from the Fund's most recent prospectus at the time of publication. Gross expenses do not reflect contractual fee waivers or expense reimbursement arrangements, if any. Net expenses reflect such arrangements only with respect to Class I. These arrangements remain in effect until 2/28/26 unless the Fund's Board of Directors approves an earlier termination. Without these arrangements, performance would have been lower.

Important Risks: Investing involves risk, including the possible loss of principal. Security prices fluctuate in value depending on general market and economic conditions and the prospects of individual companies. • Fixed income security risks include credit, liquidity, call, duration, event and interest-rate risk. As interest rates rise, bond prices generally fall. • The risks associated with mortgage-related and asset-backed securities as well as collateralized loan obligations (CLOs) include credit, interest-rate, prepayment, liquidity, default and extension risk. • The purchase of securities in the To-Be-Announced (TBA) market can result in higher portfolio turnover, which could increase transaction costs and an investor's tax liability. The risks associated with the TBA market include price and counterparty risk. • Obligations of U.S. Government agencies are supported by varying degrees of credit but are generally not backed by the full faith and credit of the U.S. Government. • Derivatives are generally more volatile and sensitive to changes in market or economic conditions than other securities; their risks include currency, leverage, liquidity, index, pricing, valuation, and counterparty risk. • Foreign investments may be more volatile and less liquid than U.S. investments and are subject to the risk of currency fluctuations and adverse political, economic and regulatory developments. These risks may be greater, and include additional risks, for investments in emerging markets. • Restricted securities may be more difficult to sell and price than other securities. • Investments in high-yield ("junk") bonds involve greater risk of price volatility, illiquidity, and default than higher-rated debt securities. • The portfolio managers may allocate a portion of the Fund's assets to specialist portfolio managers, which may not work as intended.
