## Staying Positive Amid Volatility

Investors concerned about market volatility may benefit from a bond holding that combines quality, expertise, and performance.

### Enhance Diversification With Quality Fixed Income

Investors concerned about equity market volatility may want to consider a conservative fixed-income holding. Hartford Total Return Bond invests primarily in high-quality asset classes with tactical allocations to higher-yielding debt.

### Highly Experienced Team and Resources

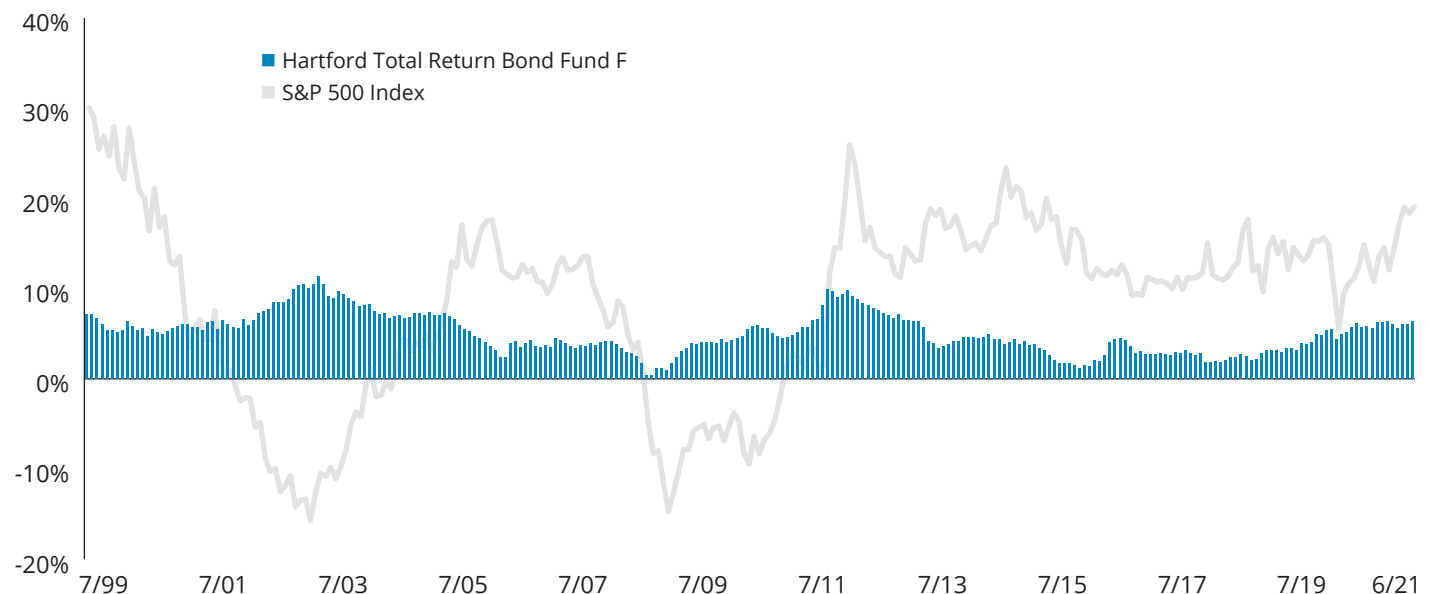

The Fund is managed by a team averaging 25 years of fixed-income investment experience. The team is supported by nine dedicated sector specialists, whose combined expertise averages 28 years.

### Improve Investor Experience

During periods of negative equity market returns, investors who complemented their equity holdings with the Hartford Total Return Bond Fund may have enjoyed less volatile overall returns.

## Historically Positive Performance During Equity Market Volatility

Credit exposure is the credit ratings for the underlying securities of the Fund as provided by Standard and Poor's (S&P), Moody's Investors Service, or Fitch and typically range from AAA/Aaa (highest) to C/D (lowest). If S&P, Moody's, and Fitch assign different ratings, the median rating is used. If only two agencies assign ratings, the lower rating is used. Securities that are not rated by any of the three agencies are listed as "Not Rated." Ratings do not apply to the Fund itself or to Fund shares. Ratings may change.

Fund Inception: 7/22/96. Share Class Inception: 2/28/17. Class F-shares performance prior to 2/28/17 reflects Class I-shares performance and operating expenses, and, prior to 8/31/06 the performance and operating expenses of Class A-shares (excluding sales charges). Performance for Class F-shares prior to its inception date would have differed if Class F- operating expenses had been reflected. Since Inception performance is calculated from 7/22/96.

\* Class F-Share Star Ratings: 3-year 4 stars out of 550 products, 5-year 4 stars out of 478 products, and 10-year 4 stars out of 341 products for the period ended herein. Other share classes may have different ratings. The Morningstar Rating™ for funds, or "star rating", is calculated for funds and separate accounts with at least a 3-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. Star rating based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance (without adjusting for any sales load, if applicable), placing more emphasis on downward variations and rewarding consistent performance. 5 stars are assigned to the top 10%, 4 stars to the next 22.5%, 3 stars to the next 35%, 2 stars to the next 22.5%, and 1 star to the bottom 10%. Overall Morningstar Rating is derived from a weighted average of the performance figures associated with its 3-, 5-, and 10-year (if applicable) Morningstar Rating metrics. **Important Risks:** Investing involves risk, including the possible loss of principal. Security prices fluctuate in value depending on general market and economic conditions and the prospects of individual companies. The Fund may allocate a portion of its assets to specialist portfolio managers, which may not work as intended. • Fixed income security risks include credit, liquidity, call, duration, event and interest-rate risk. As interest rates rise, bond prices generally fall. • The risks associated with mortgage-related and asset-backed securities as well as collateralized loan obligations (CLOs) include credit, interest-rate, prepayment, liquidity, default and extension risk. • The purchase of securities in the To-Be-Announced (TBA) market can result in higher portfolio turnover and related expenses as well as price and counterparty risk. • Derivatives are generally more volatile and sensitive to changes in market or economic conditions than other securities; their risks include currency, leverage, liquidity, index, pricing, regulatory and counterparty risk. • Foreign investments may be more volatile and less liquid than U.S. investments and are subject to the risk of currency fluctuations and adverse political, economic and regulatory developments. These risks may be greater for investments in emerging markets. • Investments in high-yield ("junk") bonds involve greater risk of price volatility, illiquidity, and default than higher-rated debt securities. • Obligations of U.S. Government agencies are supported by varying degrees of credit but are generally not backed by the full faith and credit of the U.S. Government. • Restricted securities may be more difficult to sell and price than other securities. • The Fund may have high portfolio turnover, which could increase its transaction costs and an investor's tax liability.

Bloomberg Barclays US Aggregate Bond Index is composed of securities from the Barclays Government/Credit Bond Index, Mortgage-Backed Securities Index, Asset-Backed Securities Index, and Commercial Mortgage-Backed Securities Index.
