

December 15, 2023

2023 Estimated Ordinary Income Distributions

These estimates are as of October 31, 2023, and final amounts may differ significantly from these estimates.

Hartford Mutual Funds' December 2023 ordinary income distribution estimates are listed below. The December distribution is a tax year-end and required distribution under the US Tax Code. This distribution will include regular monthly net investment income along with tax related adjustments which are only considered at the Fund tax year-end. Tax related adjustments can increase or decrease the required ordinary income distribution amount. The ordinary income distributions, if any, will be made to the shareholders of record as of December 26, 2023 (the "Record Date"). The Funds' reinvestment date (ex-dividend date) is December 27, 2023, and the payable date is December 28, 2023. This information is **NOT FINAL** and is subject to change.

*For daily accruing funds, this estimated ordinary income distribution is in addition to the regular monthly net investment income distribution which is paid on a different date. This is also known as a special or additional distribution. Please visit the Tax Center at hartfordfunds.com for more information.

**** As of the date of this memo, percentage of NAV in Class C may significantly vary from Class I for certain funds.**

Frequently Asked Questions

This FAQ is provided for information purposes only.

Each year under federal law, mutual funds are required to distribute ordinary income to their shareholders. This ordinary income distribution is the results of dividend and interest earned, realized and unrealized activity on derivative transactions. Below is a FAQ that provides additional information regarding Ordinary Income.

How are the amounts of ordinary income determined?

Distributions are generally based on dividend and interest earned, realized and unrealized activity on derivative transactions.

When an ordinary income is distributed, do shareholders lose money?

No. On the date of the distribution, the net asset value of the fund will drop by the amount paid to shareholders. This is why a fund's price per share generally decreases when distributions are made. For example, consider a fund with a \$10 net asset value that will distribute ordinary income of \$2 per share. On the date of the distribution, the net asset value of the fund will drop to \$8 per share and the \$2 distribution will be paid out to the shareholder.

A shareholder may choose to receive their distribution in cash, in which case the shareholder's account value will be reduced by the amount they take as a distribution. The shareholder may also choose to reinvest the distribution, which will result in the purchase of additional shares.

Important Information

Hartford Funds does not provide legal or tax advice. Shareholders should consult a legal or tax professional for additional information.

This information is provided for information purposes only.

Investing involves risks, including the possible loss of principal.

Please note that the funds listed as declaring a dividend on a particular date are subject to change.

Investors should carefully consider a fund's investment objectives, risks, charges and expenses. This and other important information is contained in the fund's full prospectus and summary prospectus, which can be obtained by visiting hartfordfunds.com. Please read it carefully before investing.
