

Hartford Multifactor Developed Markets (ex-US) ETF

Ticker: RODM **Exchange:** NYSE Arca

Before you invest, you may want to review the Fund's prospectus, which contains more information about the Fund and its risks. You can find the Fund's prospectus, reports to shareholders and other information about the Fund, including the Fund's daily net asset value, online at <http://www.hartfordfunds.com/etf-prospectuses.html>. You can also get this information at no cost by calling 1-800-456-7526 or request a copy of the prospectus by sending an e-mail to orders@mysummaryprospectus.com. The Fund's prospectus and statement of additional information dated November 26, 2025, as may be amended, supplemented or restated, are incorporated by reference into this summary prospectus. The Fund's statement of additional information may be obtained, free of charge, in the same manner as the Fund's prospectus.

INVESTMENT OBJECTIVE. The Fund seeks to provide investment results that, before fees and expenses, correspond to the total return performance of an index that tracks the performance of companies located in major developed markets of Europe, Canada and the Pacific Region.

YOUR EXPENSES. The table below describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table or the example below.**

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment):

Management fees	0.29%
Distribution and service (12b-1) fees	None
Other expenses	0.00%
Total annual fund operating expenses	0.29%

Example. The example below is intended to help you compare the cost of investing in the Fund with the cost of investing in other exchange-traded funds. The example assumes that:

- Your investment has a 5% return each year
- The Fund's operating expenses remain the same

Your actual costs may be higher or lower. Based on these assumptions, for every \$10,000 invested, you would pay the following expenses if you sell all of your shares at the end of each time period indicated:

Year 1	Year 3	Year 5	Year 10
\$30	\$93	\$163	\$368

Portfolio Turnover. The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund's performance. During the period from October 1, 2024 through July 31, 2025, the Fund's portfolio turnover rate was 25% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGY. The Fund seeks to provide investment results that, before fees and expenses, correspond to the total return performance of the Hartford Risk-Optimized Multifactor Developed Markets (ex-US) Index (LRODMX) (the “Index”), which is designed to address risks and opportunities within developed markets located outside the U.S. The Index selects equity securities of companies domiciled within developed international equity markets that exhibit a favorable combination of factors, including valuation, momentum, and quality. The Index seeks to outperform a capitalization-weighted universe of companies located in major developed markets of Europe, Canada and the Pacific Region over a complete market cycle with up to 15% less volatility compared to that of the capitalization-weighted universe through the Index construction process. Risk-Optimized refers to the approach Lattice Strategies LLC (“Lattice” or the “Adviser”) takes in the development and management of the Index. The Index, developed by Lattice, seeks to address identified risks within its asset class. For example, country, company, and currency concentrations, valuation insensitivity, and other unmanaged risk factors may be addressed through the index management process. Risk-optimized does not mean “lower risk,” but rather refers to the deliberate and intentional re-allocation of specific risks.

The Index is built with a rules-based, proprietary methodology that employs a multi-layered risk-controlled approach that seeks to address risks associated with the cap-weighted universe, accounting for size, country, liquidity and volatility risks. Specifically, the Index seeks to de-concentrate individual country and currency risks while emphasizing companies that exhibit persistent risk premium factors, including but not limited to, quality, momentum, and value. The Index's components are risk- and factor-adjusted twice annually, with a reconstitution and rebalance occurring in March and September. The Index was established on December 31, 2013. The Index is expected to typically include 300-400 components. The components of the Index, the number of components and the degree to which these components represent certain industries, may change over time.

The Adviser uses a “passive” or indexing approach to try to achieve the Fund's investment objective. The Fund does not try to “beat” the index it tracks and does not seek temporary defensive positions when markets decline or appear overvalued. Indexing may eliminate the chance that the Fund will substantially outperform the Index but may also reduce some of the risks of active management, such as over concentration in countries and individual equities. Indexing seeks to achieve lower costs and better after-tax performance by keeping portfolio turnover low in comparison to actively managed investment companies.

The Fund generally invests at least 80% of its assets in securities included in the Index and in depositary receipts (such as American Depositary Receipts (“ADRs”), Global Depositary Receipts (“GDRs”) and European Depositary Receipts (“EDRs”)) representing securities included in the Index. The Fund may invest the remainder of its assets in certain derivative instruments that may not be included in the Index, cash and cash equivalents, including money market funds, as well as in securities that are not included in the Index but that the sub-adviser believes will help the Fund track the Index. To the extent that the Index concentrates (i.e., holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the Fund will do so in approximately the same amount as the Index.

The Index is sponsored by Lattice. Lattice determines the composition and relative weightings of the securities in the Index and publishes information regarding the market value of the Index. The Index is calculated and distributed by Solactive AG. Additional information on the Index can be found at hartfordfunds.com.

PRINCIPAL RISKS. The principal risks of investing in the Fund are described below. When you sell your shares they may be worth more or less than what you paid for them, which means that you could lose money as a result of your investment. **An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.** As with any fund, there is no guarantee that the Fund will achieve its investment objective. For more information regarding risks and investment matters, please see “Additional Information Regarding Investment Strategies and Risks” in the Fund’s statutory prospectus.

Index Tracking Risk – While the Fund seeks to track the performance of the Index as closely as possible (i.e., achieve a high degree of correlation with the Index), the Fund’s return may not match or achieve a high degree of correlation with the return of the Index due to operating expenses, transaction costs, cash flows, regulatory requirements and operational inefficiencies.

Market Risk – Market risk is the risk that one or more markets in which the Fund invests will go down in value, including the possibility that the markets will go down sharply and unpredictably. Securities of a company may decline in value due to its financial prospects and activities, including certain operational impacts, such as data breaches and cybersecurity attacks. Securities may also decline in value due to general market and economic movements and trends, including adverse changes to credit markets, or as a result of other events such as geopolitical events, natural disasters, or widespread pandemics (such as COVID-19) or other adverse public health developments.

Equity Risk – The risk that the price of equity or equity related securities may decline due to changes in a company’s financial condition and overall market and economic conditions.

Foreign Investments Risk – Investments in foreign securities may be riskier, more volatile, and less liquid than investments in U.S. securities. Differences between the U.S. and foreign regulatory regimes and securities markets, including the less stringent investor protection, less stringent accounting, corporate governance, financial reporting and disclosure standards of some foreign markets, as well as political and economic developments in foreign countries and regions and the U.S. (including the imposition of sanctions, tariffs, or other governmental restrictions), may affect the value of the Fund’s investments in foreign securities. Changes in currency exchange rates may also adversely affect the Fund’s foreign investments.

Currency Risk – The risk that the value of the Fund’s investments in foreign securities or currencies will be affected by the value of the applicable currency relative to the U.S. dollar. When the Fund sells a foreign currency or foreign currency denominated security, its value may be worth less in U.S. dollars even if the investment increases in value in its local market. U.S. dollar-denominated securities of foreign issuers may also be affected by currency risk, as the revenue earned by issuers of these securities may also be affected by changes in the issuer’s local currency.

Mid-Cap Securities Risk – The securities of mid-capitalization companies generally trade in lower volumes and are generally subject to greater and less predictable price changes than the securities of larger capitalization companies.

Regional/Country Focus Risk – To the extent that the Fund focuses its investments in a particular geographic region or country, the Fund may be subject to increased currency, political, regulatory and other risks. A natural or other disaster could occur in a geographic region in which the Fund invests, which could affect the economy or particular business operations of companies in the specific geographic region. As a result, the Fund may be subject to greater price volatility and risk of loss than a fund holding more geographically diverse investments.

To the extent the Fund invests a significant portion of its assets in a particular economic region, such as Europe or Asia, the Fund will be more exposed to the economic and other risks associated with that region.

Passive Strategy/Index Risk – The Fund is managed with a passive investment strategy, attempting to track the performance of an unmanaged index of securities. This differs from an actively managed fund, which typically seeks to outperform a benchmark index. As a result, the Fund may hold constituent securities of the Index regardless of the

current or projected performance of a specific security or a particular industry or market sector. Maintaining investments in securities regardless of market conditions or the performance of individual securities could cause the Fund's return to be lower than if the Fund employed an active strategy.

Index Related Risk – The Fund seeks to achieve a return that corresponds generally to the total return performance, before fees and expenses, of the Index as published by Lattice. There is no assurance that Lattice will compile the Index accurately, or that the Index will be determined, composed or calculated accurately. While Lattice does provide descriptions of what the Index is designed to achieve, Lattice does not provide any warranty or accept any liability in relation to the quality, accuracy or completeness of data in respect of the Index it publishes, and does not guarantee that the Index will be in line with Lattice's described index methodology. The mandate of the Adviser and sub-adviser, as described in this prospectus, is to manage the Fund consistently with its respective Index. Errors in respect of the quality, accuracy and completeness of the data may occur from time to time and may not be identified and corrected for a period of time or at all, particularly where an index is less commonly used. Therefore, gains, losses or costs associated with the Index's errors will generally be borne by the Fund and its shareholders. For example, during a period where the Fund's Index contains incorrect constituents, the Fund would have market exposure to such constituents and would be underexposed to the Index's other constituents. As such, errors may result in a negative or positive performance impact to the Fund and its shareholders. Shareholders should understand that any gains from Index errors will be kept by the Fund and its shareholders and any losses will be borne by the Fund and its shareholders.

Apart from scheduled rebalances, Lattice may also carry out additional ad hoc rebalances to the Index in order, for example, to correct an error in the selection of index constituents. Where the Fund's Index is rebalanced and the Fund in turn rebalances its portfolio to bring it in line with its Index, any transaction costs and market exposure arising from such portfolio rebalancing will be borne directly by the Fund and its shareholders. Errors and unscheduled rebalances to the Index may also expose the Fund to tracking error risk, which is the risk that its returns may not track exactly those of the Fund's Index. Therefore, errors and additional ad hoc rebalances carried out by Lattice with respect to the Index may increase the costs and market exposure risk of the Fund. Unusual market conditions may cause Lattice to postpone a scheduled rebalance, which could cause the Index to vary from its normal or expected composition.

Industry Concentration Risk – Although the Fund generally will not invest 25% or more of the value of the Fund's total assets in the securities of one or more issuers conducting their principal business activities in the same industry or group of industries, to the extent that the Index is concentrated in a particular industry, the Fund will concentrate its investments to approximately the same degree as its Index. If the Fund focuses its investments in a specific industry or group of industries, the Fund is subject to the risk that (1) its performance will be closely tied to the performance of those particular industries; (2) its performance will be adversely impacted when such industries experience a downturn; and (3) it will perform poorly during a slump in demand for securities of companies in such industries. As a result, the Fund may be subject to increased price volatility and may be more susceptible to adverse developments in an industry than a fund that does not focus its investments in any industry.

Market Price Risk – The net asset value ("NAV") of the Fund's shares and the value of your investment may fluctuate. The market prices of the Fund's shares will generally fluctuate in accordance with changes in NAV and changes in the intraday value of the Fund's holdings, as well as the relative supply of and demand for the shares on the Fund's listing exchange. Although it is expected that the Fund's shares will remain listed on the exchange, disruptions to creations and redemptions, the existence of market volatility or lack of an active trading market for the shares (including through a trading halt), as well as other factors, may result in the shares trading significantly above (at a premium to) or below (at a discount to) the Fund's NAV or the intraday value of the Fund's holdings. In addition, because liquidity in certain underlying portfolio securities may fluctuate over time, shares of the Fund may, at times, trade at a larger than normal premium or discount to NAV. In addition, to the extent certain of the Fund's portfolio securities are trading on days or at times the Fund's shares are not trading, bid-ask spreads and the resulting premium or discount to the NAV of the Fund's shares may widen. During such periods, you may be unable to sell your shares or may incur significant losses if you sell your shares. There are various methods by which investors can purchase and sell shares and various types of orders that may be placed. Investors should consult their financial intermediary before purchasing or selling shares of the Fund. Neither the investment adviser nor the Fund's sub-adviser can predict whether the Fund's shares will trade below, at or above their NAV. Price differences may be due, in large part, to the fact that supply and demand forces at work in the secondary trading market for the Fund's shares will be closely related to, but not identical to, the same forces influencing the prices of the Fund's holdings trading individually or in the aggregate at any point in time. There can be no assurance as to whether and/or to what extent the Fund's shares will trade at premiums or discounts to NAV or to the intraday value of the Fund's holdings.

Authorized Participant Concentration Risk – Only an authorized participant may engage in creation or redemption transactions directly with the Fund. The Fund has a limited number of intermediaries that act as authorized participants on an agency basis (i.e., on behalf of other market participants), and none of these authorized participants

are or will be obligated to engage in creation or redemption transactions. To the extent that these intermediaries exit the business or are unable to or choose not to proceed with creation and/or redemption orders with respect to the Fund and no other authorized participant is able to step forward to create or redeem, Fund shares may trade at a premium or discount to NAV and possibly face trading halts and/or delisting.

Valuation Risk – The sale price the Fund could receive for a security may differ from the Fund’s valuation of the security and may differ from the value used by the Index, particularly for securities that trade in low volume or volatile markets or that are valued using a fair value methodology. In addition, the value of the securities in the Fund’s portfolio may change on days when shareholders will not be able to purchase or sell the Fund’s shares.

The Fund is subject to certain other risks, which are discussed in “Additional Information Regarding Investment Strategies and Risks” and “More Information about Risks” in the Fund’s statutory prospectus.

PAST PERFORMANCE. The performance information below indicates the risks of investing in the Fund. Keep in mind that past performance does not indicate future results. Updated performance information is available at hartfordfunds.com. The bar chart shows the Fund’s performance for each calendar year since the Fund’s inception. The table shows how the Fund’s average annual total returns for different periods compare to the returns of the Index and another broad measure of market performance, which is also the Fund’s regulatory benchmark. After-tax returns are calculated using the historical highest individual U.S. federal marginal income tax rates and do not reflect the impact of state and local taxes. In some instances, the “Return After Taxes on Distributions and Sale of Fund Shares” may be greater than “Return Before Taxes” because the investor is assumed to be able to use the capital loss from the sale of Fund shares to offset other taxable gains. Actual after-tax returns, which depend on an investor’s particular tax situation, may differ from those shown and are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts. Updated performance information is available by visiting our website at hartfordfunds.com.

Total returns by calendar year

During the periods shown in the chart above:	Returns	Quarter Ended
Best Quarter Return	14.71%	December 31, 2022
Worst Quarter Return	-24.76%	March 31, 2020

The year-to-date return of the Fund as of September 30, 2025 was 26.82%.

Average annual total returns for periods ending December 31, 2024

	1 Year	5 Years	Since Inception (2/25/2015)
Hartford Multifactor Developed Markets (ex-US) ETF			
Return Before Taxes	8.07%	3.45%	4.75%
Return After Taxes on Distributions	7.04%	2.58%	3.95%
Return After Taxes on Distributions and Sale of Fund Shares	5.50%	2.67%	3.67%
Hartford Risk-Optimized Multifactor Developed Markets (ex-US) Index	8.33%	3.61%	4.91%
MSCI World ex USA Index (Net) (reflects reinvested dividends net of withholding taxes but reflects no deduction for fees, expenses or other taxes)	4.70%	5.10%	4.81%

MANAGEMENT. The Fund's investment adviser is Lattice Strategies LLC. The Fund's sub-adviser is Mellon Investments Corporation ("Mellon" or the "Sub-Adviser").

Portfolio Manager	Title	Involved with Fund Since
Marlene Walker Smith	Senior Director, Chief Investment Officer of Mellon	2020
Todd Frysinger, CFA	Senior Vice President, Senior Portfolio Manager of Mellon	2020
David France, CFA	Senior Vice President, Senior Portfolio Manager of Mellon	2020
Michael Stoll	Senior Vice President, Senior Portfolio Manager of Mellon	2020
Vlasta Sheremeta, CFA	Senior Vice President, Senior Portfolio Manager of Mellon	2020

PURCHASE AND SALE OF FUND SHARES. The Fund is an exchange-traded fund ("ETF"). Individual Fund shares may only be purchased and sold on a national securities exchange through a broker-dealer and may not be purchased or redeemed directly with the Fund. The price of Fund shares is based on market price, and because ETF shares trade at market prices rather than at NAV, shares may trade at a price greater than NAV (a premium) or less than NAV (a discount). When buying and selling Fund shares on an exchange, therefore, investors may incur costs related to the difference between the highest price a buyer is willing to pay to purchase Fund shares (bid) and the lowest price a seller is willing to accept for Fund shares (ask) (the "bid-ask spread"). The Fund will only issue or redeem shares at NAV that have been aggregated into blocks of shares ("Creation Units") to authorized participants ("Authorized Participants") who have entered into participant agreements with the Fund's distributor, ALPS Distributors, Inc. (the "Distributor"). The Fund will issue or redeem Creation Units in return for a basket of securities and/or cash that the Fund specifies each business day. Additional information about the Fund, including the Fund's net asset value, market price, premiums and discounts and bid-ask spreads can be found at hartfordfunds.com.

TAX INFORMATION. The Fund's distributions are generally taxable, and may be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account. Such tax-deferred arrangements may be taxed later upon withdrawal of monies from those arrangements.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES. If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund's related companies may pay the intermediary for services and/or data related to the sale of Fund shares. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your financial intermediary to recommend the Fund over another investment. Ask your financial intermediary or visit your financial intermediary's website for more information.
