

Hidden Costs of Caring: Where to Turn for Help When You Are the Helper

Joseph F. Coughlin, PhD
Director, MIT AgeLab

Aging is not just about the old. Families are typically the primary source of care and support as we age. While doctors, nurses, social workers, and other professionals may call it caregiving, most people simply consider providing help to an older loved one being a loving spouse or a good adult child.

Caregiving is a catchall phrase that encompasses an important and extensive set of activities that evolve (sometimes slowly, other times rapidly) with the needs of the care recipient. This paper provides financial professionals and investors with an overview of caregiving—what it is, who is most likely to provide it, what the associated costs are, and where those who are providing care to an older adult can turn for help.

“There is no training or manual for providing care. Consequently, caregivers often feel alone and left to navigate an unknown set of problems and a maze of possible services.”

*Dr. Joe Coughlin, PhD
Director, MIT AgeLab*

What Is Caregiving?

Caregiving, or informal care, is when a family member or friend provides unpaid help with a wide range of tasks to assist an older adult in his or her daily life. These activities can be as simple as giving a ride to the grocery store and cleaning out the refrigerator, or as complex as managing multiple medications and administering care to a wound.

The nature of caregiving and associated tasks change as the care recipient's condition evolves. The figure below provides an overview of the 'caregiver career.' Over time, the demands of providing care are likely to increase in their diversity and intensity, placing a commensurate increase of physical and emotional burden on the caregiver. However, there is no set schedule for any one set of tasks. Rather, change can happen gradually or dramatically with a health event such as a stroke or an accident in the home.

At first, caregiving may look like periodic, simple phone calls or check-ins to maintain social contact. While still independent, an older loved one may need to be reminded to refill prescriptions, or take medications on time, in the correct dose, with the appropriate meal. Over time, other tasks may emerge, such as providing transportation to

the doctor's office or routine home maintenance, such as changing a light bulb. In many instances, a caregiver may serve as a healthcare advocate or intermediary, speaking with physicians, pharmacists, and others.

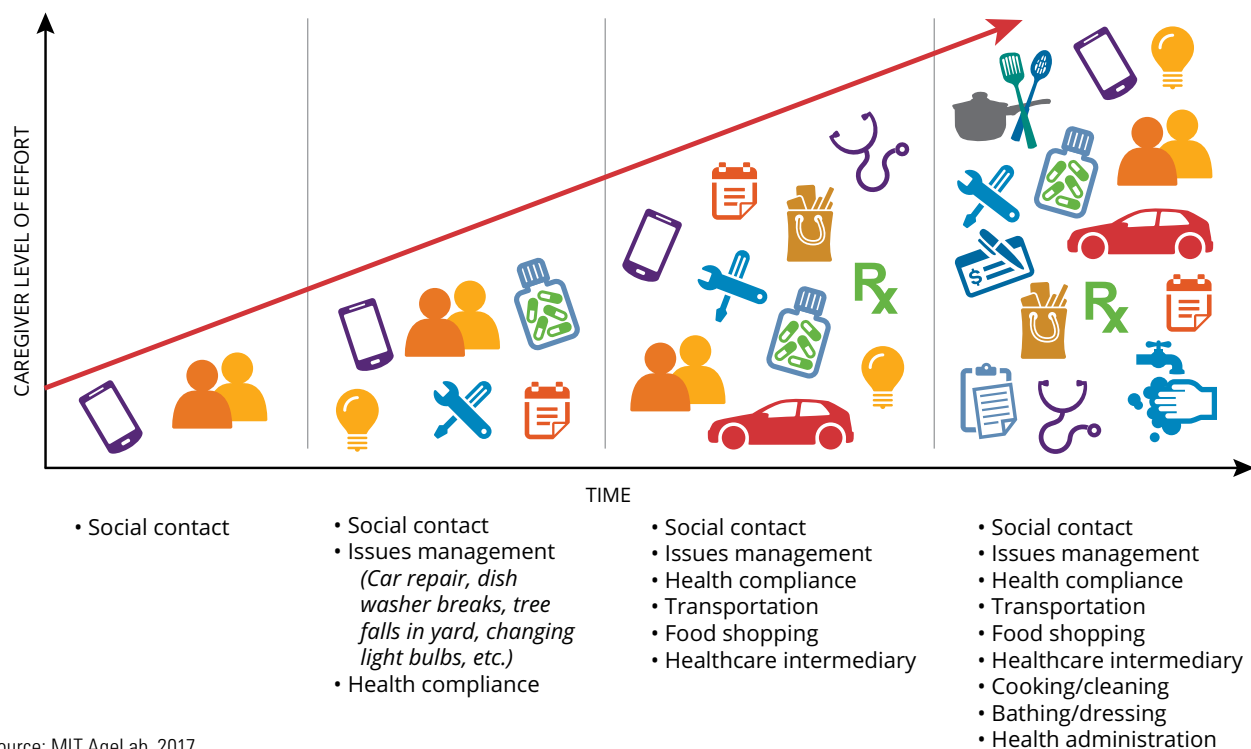

Caregivers may also provide assistance with financial responsibilities such as paying bills or balancing the household checkbook, especially in situations with cognitive decline. Increasing physical frailty or limitations may require the caregiver to help with daily activities, such as washing, dressing, and toileting, adding significant physical and emotional demand to the caregiver.

Who Is the Caregiver?

Today, 41.8 million Americans (14.3% of the population) provide care for someone age 50 or older. The number of caregivers will continue to increase as our population ages.¹ Most caregivers are caring for a parent (42%) or parent-in-law (8%), or for a spouse or partner (12%).¹ Two out of 3 care recipients are women and about 4 in 10 are men.¹

Often referred to as the "sandwich generation," younger baby boomers in their 50s and Gen X-ers in their late 40s, are described as "sandwiched," or caught in the middle,

Caregiving Gets More Complex Over Time: Four Levels of Caregiving

caring for both their children and aging parents. Many of these caregivers are also employed, adding their career to the list of “jobs” they are juggling.

Costs of Caring

While providing care to an elderly family member or friend is most often done out of love and loyalty, there is a cost to caring. Caregiving affects time, physical and emotional well-being, and finances.

On average, caregivers spend 23.7 hours per week providing care.¹ However, the amount of time dedicated to caregiving varies among individuals’ situations and is dependent on multiple factors. For example, 21% of caregivers caring for someone age 50+ spend 41 hours or more per week providing care.¹ Thirty six percent of caregivers consider their caregiving situation to be highly stressful.¹ Further, 18% of caregivers report experiencing high financial strain as a result of providing care.¹ Caregivers spend on average \$7,000 out-of-pocket annually on caregiving-related expenses, such as household goods, food and meals, travel and transportation costs, and medical expenses².

Where to Find Help

Becoming a caregiver can happen over time or sometimes instantly, as the result of a health event or accident. There is no training or manual for providing care. Consequently, caregivers often feel alone and left to navigate an unknown set of problems and a maze of possible services. Below are selected organizations and service providers

Faces of Caregivers¹

Those caring for someone 50+

- 12% care for a spouse or partner
- 50% care for a parent or parent-in-law
- 46% of caregivers care for someone age 75 or older
- 10% care for a non-relative
- Average age of caregivers is 49.4
- 61% of caregivers are female
- 76% of caregivers care for one person, 24% care for more than one person

that may help caregivers with a range of tasks.

Area Agencies on Aging: Area Agencies on Aging (AAAs) are experts on all aspects of aging. Created by a Federal law, AAAs help older Americans and their caregivers live quality lives with independence and dignity. There are over 600 AAAs in the United States providing a wide range of services including meals-on-wheels, transportation, home care, and general support.

Alzheimer’s Association Chapters: The Alzheimer’s Association provides supportive programs, services, and information throughout the United States. Local chapters help people with Alzheimer’s and their caregivers deal with the disease and its impact on their lives.

Sharing Economy Services: On-demand service providers that can be organized and requested by smartphone or online are widely available in major metropolitan areas. Examples include Lyft and Uber for transportation as well as wide variety of other firms that can assist with home maintenance (TaskRabbit), home care (Honor), home grocery delivery (Peapod), and other services.

Home Health Aides and Home Care Providers: Home health aides typically provide assistance with a range of activities, such as bathing, ambulation, transferring, cooking, eating, housekeeping, and basic health services. Home care assistants help with household chores and personal care. There are both for-profit and non-profit service providers.

Percentage of Caregivers of Adults Who Are in Each Generation, 2020¹

Generation Z (born 1997 or after)	6%
Millennial (born 1981 to 1996)	23%
Generation X (born 1965 to 1980)	29%
Baby Boomers (born 1946 to 1964)	34%
Silent/Greatest (born 1945 or prior)	7%

Next Step

1. Realize that caregiving gets more complicated over time
2. Don't do caregiving by yourself. Explore caregiving support resources on pages 3-4 of this whitepaper.

The MIT AgeLab was created in 1999 to invent new ideas and creatively translate technologies into practical solutions that improve people's health and enable them to "do things" throughout their lifespan. Based within MIT's School of

Engineering's Engineering Systems Division, the AgeLab applies consumer-centered systems thinking to understand the challenges and opportunities of longevity and emerging generational lifestyles to catalyze innovation across business markets. The MIT AgeLab provides insights to Hartford Funds about consumer behavior and decision-making, and trends in demographics, technology, and lifestyles. These trends impact the way people do business with financial-services providers.

Joseph F. Coughlin, Ph.D. is Director of the Massachusetts Institute of Technology AgeLab. His research examines how the disruptive demographics of an aging society, social trends, and technology will shape future innovations in business and

government. Coughlin teaches in MIT's Department of Urban Studies and Planning as well as Sloan School of Management Advanced Management Program. Coughlin is frequently interviewed by The Economist, The Financial Times, The New York Times, The Wall Street Journal, Straights Times, and other business and technology publications.
