

2023 Could Be a Good Year for the Stock Market

The third year of a presidency and the year after midterm elections have historically been good for investors.

Regardless of which party controls the Senate and/or House of Representatives after the midterm elections, investors may stand to benefit. The third year of a president's term has historically been the strongest—often by a wide margin. This could be because presidents do everything in their power to stimulate the economy as they prepare to run for re-election.

The Third Year of a Presidential Term Has Historically Been the Strongest for Markets—By Far

S&P 500 Index average annual returns for each year of a 4-year presidential term since 1950
